Community Gerard Delanty, 2009-12-04 The increasing individualism of modern Western society has been accompanied by an enduring nostalgia for the idea of community as a source of security and belonging and in recent years as an alternative to the state as a basis for politics Gerard Delanty begins this stimulating introduction to the concept with an analysis of the origins of the idea of community in Western Utopian thought and as an imagined pristine condition equated with traditional societies in classical sociology and anthropology He goes on to chart the resurgence of the idea within communitarian thought the complications and critiques of multiculturalism and its new manifestations within a society where new modes of communication produce both fragmentation and the possibilities of new social bonds Contemporary community he argues is essentially a communication community based on new kinds of belonging No longer bounded by place we are able to belong to multiple communities based on religion nationalism ethnicity life styles and gender
