The Design And Evaluation Of Public Library Buildings:

The Design and Evaluation of Public Library Buildings Nolan Lushington, James Michael Kusack, 1991 Supercedes Lushington's now classic *Libraries designed for users 1980* by looking at planning a library in the context of new technology, new expectations of libraries and new ways of evaluating the finished product. Describes initial design emphasizing flexibility and the library's many roles and also explains how to modify libraries in use to bring them into line with the design goals. Written for library administrators rather than for architects.

Architecture Sourcebook James M. Ethridge, Kathryn M. Wayne, Karen Ethridge, 1997 Profiling 5,261 active dealers, the new edition of this unique reference tool gives key facts about dealers in used and antiquarian books as well as specialty dealers who cover subjects in depth. Each entry not only provides name, address, phone, fax, e-mail and other basic information but also gives up to 16 additional details if reported by dealers including size and composition of stock, discounts to the trade, electronic search networks used, catalogs issued, services provided, professional memberships, etc. Three detailed indexes: Subject Index, Store Name Index, and Owner and Manager Index provide easy access to all information in the main entries.

Planning the Small Library Facility Anders Dahlgren, 1996 Encompassing planning and design considerations for facilities housing small libraries of all types from school libraries to hospital libraries, this text discusses the planning constraints that may occur when a library is housed or planned as one component.

Library Construction from a Staff Perspective Staff of the Williamsburg Regional Library, 2001-02-15. Written from the perspective of staff members who worked in the Williamsburg Regional Library system during four years of multiple construction projects, this fresh and straight-on text covers both new construction and renovation and additions. The results at Williamsburg are exemplary; one patron commented, "The building is a wedding of books and light which gives wings to the spirit." As the Williamsburg staff relates their experiences, the reader is guided through the construction. The book is a collaborative effort of the library's staff, shared directly with the reader, the knowledge gained in the process, the reality of costs in choosing priorities, working with architects, contractors, and project managers, patron considerations, and technology upgrades. Also included are ideas for celebratory events, fundraising, and interaction with boards of directors and local government in building a team. Appendices conclude the work with a summary, timeline, technology specifications, and useful charts.

Post-occupancy evaluation of library buildings Karen Latimer, Dorothea Sommer, 2015-09-25 Architectural realisation of a building and its opening to the public with a range of services are central components of the building and design process of libraries. Post-Occupancy Evaluation (POE) is the final step in this process. It provides an opportunity to assess whether the construction and design of the building has indeed met the library's and users' requirements and how effectively the building functions.

Enhancing Building Performance Shauna Mallory-Hill, Wolfgang F. E. Preiser, Christopher G. Watson, 2012-03-05 Building Performance Evaluation (BPE) informs and enhances the usability and sustainability of building designs with lessons learned from evaluation of building performance throughout the building life cycle from initial planning

through occupancy to adaptive re use A key feature of BPE is that it examines design and technical performance of buildings alongside human performance criteria That is it seeks to examine facilities in order to determine whether they will work for the people that will use and occupy them Rigorous BPE helps to improve design practice by providing feedback on the effectiveness of the choices made about the building to ensure that its design is optimised for stakeholders uses The overarching theme for Enhancing Building Performance is to present the next generation of BPE work The book provides an updated systematic approach for BPE as well as chapters written by experts from around the world who demonstrate how to apply BPE to enhance building design Topics covered include evidence based and integrative design processes evaluation methods and tools and education and knowledge transfer In addition case studies provide specific examples of how BPE has been used to study such things as the impact of workplace design on human productivity and innovation Written primarily for design professionals and facility managers who wish to use BPE to deliver improved building performance that is responsive to the needs of stakeholders Enhancing Building Performance will also be of great value to researchers and students across a range of architecture and construction disciplines
