## **The Development Of The Rudder A Technological Tale:**

**The Development of the Rudder** Lawrence V. Mott, 1997 Far exceeding anything ever before written on the subject The Development of the Rudder endeavors to unravel the mysteries of the evolution of a vital piece of seafaring equipment And in the process Lawrence V Mott answers far reaching questions on why some technologies develop and endure while others are soon replaced In this first considered historical overview of the rudder Mott begins his examination in the Roman period and from there traces rudder development through the middle centuries to the age of exploratory navigation by which time the quarter rudder had been replaced by the pintle and gudgeon rudder Throughout he offers a thorough analysis of the mechanics of these rudder systems while never losing sight of the human interest that attends the radical changes brought on by innovation The layperson will find in this unique work a penetrating look into the history of technology at sea a history that defies the linear constructs often associated with developmental and evolutionary theory Maritime historians nautical archaeologists and ship modelers will embrace this book as an invaluable reference which includes useful appendixes filled with technical data for researchers and scholars The Development of the Rudder, A.D. 100-1600 Lawrence V. Mott, 1991

War at Sea in the Middle Ages and the Renaissance John B. Hattendorf, Richard W. Unger, 2003 Wide ranging in place and time yet tightly focused on particular concerns these new and original specialist articles show how observations on the early history of warfare based on the relatively stable conditions of the late seventeenth century ignore the realities of war at sea in the middle ages and renaissance In these studies naval historians firmly grounded in the best current understanding of the period take account of developments in ships guns and the language of public policy on war at sea and in so doing give a stimulating introduction to five hundred years of maritime violence in Europe
