Martinez-Garcia,Luis Puelles,Hans J Ten Donkelaar,2014-10-27 The brain of each animal shows specific traits that reflect its phylogenetic history and its particular lifestyle Therefore comparing brains is not just a mere intellectual exercise but it helps understanding how the brain allows adaptive behavioural strategies to face an ever changing world and how this complex organ has evolved during phylogeny giving rise to complex mental processes in humans and other animals These questions attracted scientists since the times of Santiago Ramon y Cajal one of the founders of comparative neurobiology In the last decade this discipline has undergone a true revolution due to the analysis of expression patterns of morphogenetic genes in embryos of different animals The papers of this e book are good examples of modern comparative neurobiology which mainly focuses on the following four Grand Questions a How are different brains built during ontogeny b What is the anatomical organization of mature brains and how can they be compared c How do brains work to accomplish their function of ensuring survival and ultimately reproductive success d How have brains evolved during phylogeny The title of this e book Adaptive Function and Brain Evolution stresses the importance of comparative studies to understand brain function and the reverse of considering brain function to properly understand brain evolution These issues should be taken into account when using

animals in the research of mental function and dysfunction and are fundamental to understand the origins of the human mind

Tisza Tales Rosika Schwimmer,1928 **How the Goldfish Got Its Name** Elena Schietering,2021-05-10 In a beautiful peaceful jungle all of the animals get along They spend long lazy days enjoying each other and their glorious home They rest in the warm soft sun or swim in the cool refreshing water Then suddenly something unusual happens One day some birds flying high above the jungle spot a glistening pot of gold at the end of a rainbow and immediately tell all of the other jungle animals about it But soon the beauty of their treasure brings out jealousy and greed and the animals argue over who should own the gold The only jungle creatures who stay quiet and make no claim to the treasure are the plain white fish swimming in the pond deep in the jungle at the gathering place where the animals meet The fish don t think they are special enough to possess something as beautiful as the gold Then as all of the animals are arguing and proclaiming their own greatness something magical happens that changes the fish forever and teaches their jungle friends a lesson in kindness and humility With beautiful illustrations and engaging text this inspiring fable communicates a powerful message of how greed can ruin friendships and how kindness and humility are rewarded
