**Economics of Maritime Business** Shuo Ma, 2020-06-02. This book provides a comprehensive introduction to the economics of the business of maritime transport. It provides an economic explanation of four aspects of maritime transport namely the demand, the supply, the market, and the strategy. The book first explains why seaborne trade happens and what its development trends are; it then analyses the main features of shipping supply and how various shipping markets function; the book finally addresses the critical strategic issues of the shipping business. The full range of different types of shipping are covered throughout the chapters and cases. The book combines the basic principles of maritime

transport with the modern shipping business and the latest technological developments particularly in the area of digital disruption The ideas and explanations are supported and evidenced by practical examples and more than 160 tables and figures The questions posed by the book are similar to those that would be asked by the students in their learning process or the professionals in the business environment with the answers concentrating on the reasons for what has happened and will happen in the future rather than merely fact telling or any specific forecast The book is most suited for students of shipping related disciplines and is also a valuable reference for maritime professionals     The Business of Shipping Lane C

**sequence of strategic and operational considerations** Hans-Christian Stockfisch,2015-10-06 Master s Thesis from the year 2015 in the subject Business economics Supply Production Logistics grade 2 0 Hamburg School of Business

Administration gGmbH Maritime and Logistics HSBA Hamburg School of Business Administration course MBA Shipping language English abstract This thesis develops a methodology that gives guidance through the process of identifying a business opportunity in shipping by spotting an emerging niche in the market and setting up a corresponding business model to establish a promising company The focus lies on shipping entrepreneurs who are entirely dependent on investment capital and therefore have to be well prepared to attract investors The thesis is composed of five chapters Chapter One is introductory defines the basic terminology and sets assumptions for the further analysis Chapter Two explores the signals indicating emerging niches in the market covering the first part of identifying a business opportunity Chapter Three and Four cover the second part of the identification process discussing considerations regarding the strategic framework as well as the operational management of the startup Conclusions are drawn in chapter Five The key findings are that the financial and corporate structure of the business model is mutually dependent Therefore a holistic approach of the venture must be taken into account to successfully identify and approach a business opportunity Furthermore it is found that the entrepreneurs have to integrate a prudent risk management to attract investors and to prepare the company for present and future challenges This should be complemented by a proactive and transparent style of management However there is no unique all in one solution for the establishment of a new company as every business case is different and must be conducted individually Nevertheless the tools and considerations presented in this thesis offer practical guidance and lower risks and uncertainties in the decision making processes of the shipping entrepreneurs     **Creating Global Shipping** Gelina
