The Danube Covenant John Michael Elliot,1977 *Hydropolitical Vulnerability and Resilience Along International Waters* ,2009 The hydro vulnerability of Europe is governed by the institutions created to resolve transboundary water issues in a cooperative manner that attempts to prevent potential conflict Institutional capacity through water management bodies treaties or generally positive international relations is possibly more important than the physical environment for minimising hydropolitical vulnerability and conflict on the one hand and strengthening resilience and cooperation on the other hand This publication aims at a broader promotion and dissemination of assessed information and data that can support informed policy making
