The Death Of Capital:

The Death of Capital Stephen E. Harris, 1977 **The Death Penalty** Roger Hood, Carolyn Hoyle, 2015 The fifth edition of this highly praised study charts and explains the progress that continues to be made towards the goal of worldwide abolition of the death penalty The majority of nations have now abolished the death penalty and the number of executions has dropped in almost all countries where abolition has not yet taken place Emphasizing the impact of international human rights principles and evidence of abuse the authors examine how this has fueled challenges to the death penalty and they analyze and appraise the likely obstacles political and cultural to further abolition They discuss the cruel realities of the death penalty and the failure of international standards always to ensure fair trials and to avoid arbitrariness discrimination and conviction of the innocent all violations of the right to life They provide further evidence of the lack of a general deterrent effect shed new light on the influence and limits of public opinion and argue that substituting for the death penalty life imprisonment without parole raises many similar human rights concerns This edition provides a strong intellectual and evidential basis for regarding capital punishment as undeniably cruel inhuman and degrading Widely relied upon and fully updated to reflect the current state of affairs worldwide this is an invaluable resource for all those who study the death penalty and work towards its removal as an international goal

The Death of Capital Michael E. Lewitt, 2010-03-25 In *The Death of Capital* respected portfolio manager and longtime investment professional Michael Lewitt looks at how the U S economy has increasingly been dominated by short term speculation rather than industrial expansion in recent years These disastrous trends described here as financialization ignore the fact that capital itself is a highly unstable process rather than a fixed object or category As a result of our failure to understand the true nature of capital we have developed a financial and regulatory system that does exactly the opposite of what it should be doing favoring obscurity over transparency and fomenting instability rather than growth In explaining where we have gone wrong Lewitt pulls few punches in criticizing some of the counterproductive forces that have led to the death of capital including Wall Street practices such as private equity and derivatives trading which he views both as economically unproductive and morally misguided Page by informative page this timely guide Addresses financialization and its consequences such as a weaker U S dollar the destruction of American industries and the loss of American economic and political influence Explores the most important aspects of capital and capitalism through the prism of four of the world's great economic thinkers Discusses how the legal system aided economic weakening by privileging short term investment goals Calls for politically controversial reforms such as stricter regulation of hedge funds and private equity firms banning naked credit default swaps and Structured Investment Vehicles and principles based reforms to improve systemic stability Financial reform is needed to make sure capital does not die again Filled with in depth insights and practical advice *The Death of Capital* is not just a play by play of the recent financial crisis but an original and passionate analysis of the trends that led to it and what can be done in a regulatory sense to address the problems

The Death

Penalty Roger Hood CBE QC (Hon) DCL FBA, Carolyn Hoyle, 2008-03-27 The 4th edition of this authoritative study of the death penalty now written jointly with Carolyn Hoyle brings up to date developments in the movement to abolish the death penalty worldwide It draws on Roger Hood's experience as consultant to the United Nations for the UN Secretary General's five yearly surveys of capital punishment and on the latest information from non governmental organizations and the academic literature Not only have many more countries abolished capital punishment but even amongst those that retain it the majority have been carrying out fewer executions Legal challenges to the mandatory capital punishment have been successful as has the pressure to abolish the death penalty for those who commit a capital crime when under the age of 18 This edition has more to say about the prospects that China will restrict and control the number of executions on the road to abolition Yet despite such advances this book reveals many human rights abuses where the death penalty still exists In some countries a wide range of crimes are still subject to capital punishment and the authorities too often fail to meet the safeguards embodied in international human rights treaties to safeguard those facing the death penalty There is evidence of police abuse unfair trials lack of access to competent defence counsel excessive periods of time spent on in horrible conditions on death row and public painful forms of execution The authors engage with the latest debates on the realities of capital punishment especially its justification as a uniquely effective deterrent whether it can ever be administered equitably without discrimination or error and what influence relatives of victims should have in sentencing and on the public debate For the first time it also discusses the problem of devising an alternative to capital punishment especially life imprisonment without the possibility of parole
