## **The Death Of Children:**

**Global Perspectives on Death in Children's Literature** Lesley D. Clement, Leyli Jamali, 2015-07-30 This volume visits death in children's literature from around the world making a substantial contribution to the dialogue between the expanding fields of Childhood Studies, Children's Literature and Death Studies. Considering both textual and pictorial representations of death, contributors focus on the topic of death in children's literature as a physical reality, a philosophical concept, a psychologically challenging adjustment and/or a social construct. Essays covering literature from the US, Mexico, El Salvador, Guatemala, Canada, the UK, Sweden, Germany, Poland, Bulgaria, Brazil, Czechoslovakia, the Soviet Union, India and Iran display a diverse range of theoretical and cultural perspectives. Carefully organized sections interrogate how classic texts have been adapted for the twenty-first century, how death has been politicized, ritualized or metaphorized, and visual strategies for representing death and how death has been represented within the context of play. Asking how different cultures present the concept of death to children, this volume is the first to bring together a global range of perspective on death in children's literature and will be a valuable contribution to an array of disciplines.

**Never Too Young to Know** Phyllis Rolfe Silverman, 1999-08-26 In spite of society's wish to protect and insulate children from death, the experience of loss is unavoidable and there is surprisingly little guidance on how to help children cope with grief and bereavement. *Never Too Young to Know: Death in Children's Lives* is the first book to bring together diverse fields of study, offering a practical as well as multifaceted theoretical approach to how children cope with death. Using stories of children's own experiences supported by data from a large research study, Silverman explains the wide range of effects of loss upon children and the challenges they face as they grieve. Silverman presents grief as a normal part of the life cycle which results not only in pain and sadness but also in change and growth. She further explains that children can and do cope effectively with loss and the changes it brings as long as they are taught to understand that death is a part of life and that they will be included appropriately in the family drama. *Never Too Young To Know: Death in Children's Lives* is divided into three parts. The first section includes an overview and theoretical framework that examines the social, historical, developmental and familial forces that frame and focus children's lives as they experience loss. The second section offers a detailed analysis of how children experience mourning different types of death, including the death of siblings, parents and friends, and death due to illness, suicide, accidents and violence. The final section includes an accessible guide to helping children cope with grief, emphasizing the importance and the necessity of social support as children learn to adapt to their new lives. *Never Too Young To Know: Death in Children's Lives* is not only ideal for advanced undergraduate and graduate students learning about children but it is also useful for courses on death and dying and the family. It is also an invaluable book for mental health practitioners, clergy, schoolteachers, nurses, pediatricians as well as the general reader interested in learning how to deal with death in children's lives.

Finkbeiner,2012-12-11 For a parent losing a child is the most devastating event that can occur Most books on the subject

focus on grieving and recovery but as most parents agree there is no recovery from such a loss This book examines the continued love parents feel for their child and the many poignant and ingenious ways they devise to preserve the bond Through detailed profiles of parents Ann Finkbeiner shows how new activities and changed relationships with their spouse friends and other children can all help parents preserve a bond with the lost child Based on extensive interviews and grief research Finkbeiner explains how parents have changed five to twenty five years after the deaths of their children The first half of the book discusses the short and long term effects of the child s death on the parent s relationships with the outside world that is with their spouses other children friends and relatives The second half of the book details the effect on the parents internal world their continuing sense of guilt their need to place the death in some larger context and their inability sometimes to consistently do so their new set of priorities the nature of their bond with the lost child and the subtle and creative ways they have of continuing that bond Finkbeiner s central point is not so much how parents grieve for their children but how they love them Refusing to fall back on pop jargon about recovery or to offer easy solutions or standardized timelines Finkbeiner s is a genuine and moving search to come to terms with loss Her complex profiles of parents resonate with the honesty and authenticity of uncomfortable emotions expressed and most importantly shared with others experiencing a similar loss Finally each profile exemplifies the many heroic ways parents learn to live with their pain and by so doing honor the lives their children should have lived **Children Die, Too** Joy Johnson,S.
