Edgardo Bucciarelli, Shu-Heng Chen, Juan Manuel Corchado, 2018-12-28 The special session on Decision Economics DECON is a scientific forum held annually which is focused on sharing ideas projects research results models and experiences associated with the complexity of behavioural decision processes and socio economic phenomena In 2018 DECON was held at Campus Tecnológico de la Fabrica de Armas University of Castilla La Mancha Toledo Spain as part of the 15th International Conference on Distributed Computing and Artificial Intelligence For the third consecutive year this book have drawn inspiration from Herbert A Simon's interdisciplinary legacy and in particular is devoted to designs models and techniques for boundedly rational decisions involving several fields of study and expertise It is worth noting that the recognition of relevant decision making takes place in a range of critical subject areas and research fields including economics finance information systems small and international business management operations and production Therefore decision making issues are of fundamental importance in all branches of economics addressed with different methodological approaches As a matter of fact the study of decision making has become the focus of intense research efforts both theoretical and applied forming a veritable bridge between theory and practice as well as science and business organisations whose pillars are based on

insightful cutting edge experimental behavioural and computational approaches on the one hand and celebrating the value of science as well as the close relationship between economics and complexity on the other In this respect the international scientific community acknowledges Herbert A Simon s research endeavours to understand the processes involved in economic decision making and their implications for the advancement of economic professions Within the field of decision making indeed Simon has become a mainstay of bounded rationality and satisficing His rejection of the standard unrealistic decision making models adopted by neoclassical economists inspired social scientists worldwide with the purpose to develop research programmes aimed at studying decision making empirically experimentally and computationally The main achievements concern decision making for individuals firms markets governments institutions and last but not least science and research This book of selected papers tackles these issues that Simon broached in a professional career spanning more than sixty years The Editors of this book dedicated it to Herb      **Work Related Abstracts** ,1980      *Drexel Library*
