**Rural Depopulation in England and Wales, 1851-1951** John Saville,2013-10-08 First Published in 1998 This book aims to accommodate for the little attention paid to the needs of the people living in rural Britain The author argues that there has hardly been an attempt to describe the impact of new machines and of new wage levels on farm and village The title sets out to answer two key questions can the traditional pattern of settlement survive and has depopulation in the truly rural areas gone so far as to undermine the viability of the small villages and hamlets      **The Petite Bourgeoisie in Europe 1780-1914** Geoffrey Crossick,Heinz-Gerhard Haupt,2013-10-18 Crossick and Haupt provide a major overview of the social economic cultural and political development of the petite bourgeoisie in modern Europe a group until now largely neglected by European social historians Through comparative analysis the authors examine issues such as the centrality of small enterprise to industrial change the importance of family and locality to the petit bourgeois world the search for stability and status and the associated political move to the right Crossick and Haupt have written an invaluable and authoritative assessment of the emergence of a distinctive petit bourgeois cultural and political identity It will be of interest to both undergraduate students and academic historians      *The English Village* William Pearson Baker,1971-12-28      *The English Rural Community* Brian Short,1992-06-04 This book examines the English rural community past and present in its variety and dynamism The distinguished team of contributors brings a variety of disciplinary perspectives to bear upon the central issues of movement and migration the farm family and rural labour force the development of contrasting rural communities the portrayal of rural labour in both high and popular culture the changing nature of religious practice in the English countryside the rural urban fringe and the spread of notions of a rural English arcadia within a predominantly urban society Fully illustrated with accompanying maps paintings and photographs The English Rural Community provides an important and innovative overview of a subject where history myth and debate are inseparably entwined A full bibliography will assist a broad range of general readers and students of social history historical geography and development studies approaching the subject for the first time and the whole should establish itself as the central analytical account in an area where image and reality are notoriously hard to unravel      *Paradise Lost* Jeremy Burchardt,2002-07-26 The enduring Town versus Country debate lies at the root of modern British society How far did the idealization of the countryside by artists and writers since the Industrial Revolution foster anti urban anti industrial values How have such values affected government policy social structure and economic dynamism Did post war developments in particular rural urban commuting and environmentalist criticism of modern industrial farming undermine the traditional distinction between town and country or are they themselves symptoms of the continuing allure of the rural idyll This book will demonstrate the remarkable influence that attitudes to the countryside have had on the evolution of modern British life      **Custom and Commercialisation in**

**English Rural Society** J. P. Bowen, A. T. Brown, 2016-03-01 English rural society underwent fundamental changes between the thirteenth and eighteenth centuries with urbanization commercialization and industrialization producing new challenges and opportunities for inhabitants of rural communities However our understanding of this period has been shaped by the compartmentalization of history into medieval and early modern specialisms and by the debates surrounding the transition from feudalism to capitalism and landlord tenant relations Inspired by the classic works of Tawney and Postan this collection of essays examines their relevance to historians today distinguishing between their contrasting approaches to the pre industrial economy and exploring the development of agriculture and rural industry changes in land and property rights and competition over resources in the English countryside These case studies further highlight the regional diversity of medieval and early modern England by focusing on the mixed economies of south western western and northern England and the role of coastal and urban communities within the rural economy Custom was a contested set of rules based upon historical precedent which governed the behaviour of village communities and a key theme of Tawney s Agrarian Problem was the struggle between custom and competition This collection of essays reconsiders the role of custom in medieval and early modern England by arguing that it often facilitated the commercialization of rural society in this period rather than hindering it thereby offering an alternative to the landlord tenant approach Commercialization was often aided by custom because it enabled tenants to accumulate wealth and engage with market forces in ways that were previously impossible Although custom may have featured prominently in popular politics it was also frequently articulated to benefit the commercial and industrial interests of lords Instead of concentrating on a particular period or century Custom and Commercialization has an intentionally broad chronological span ranging from the thirteenth century through to the eighteenth exploring the interactions between custom and commercialisation at a key stage in the economic development of English rural society The contributors include James P Bowen John Broad A T Brown Christopher Dyer John Gaisford Tom Johnson David Rollison Simon Sandall Alexandra Sapoznik William D Shannon Sheila Sweetinburgh and Andy Wood     The English Village Constable, 1580-1642 Joan R. Kent, 1986 Are Shakespeare s Dogberry Dull and Elbow accurate characterizations of 16th and 17th century English constables Kent demonstrates that far from being lowly and incompetent the constables of early modern England provided a flexible effective means of interlinking state and local communities     *British Economic and Social History* R.
