The Design of Rural Development Uma J. Lele, World Bank, 1975 *The design of rural development* Uma Jayant Lele, 1975 **The Design of Rural Development** Uma Lele, 1975 *Designing Rural Development Programs* Uma J. Lele, 1974 *Resources in Education*, 1990 *Journal of African Studies*, 1983 *Political Economy of Hunger* Jean Drèze, Amartya Sen, 1991-02-21 This is an open access title available under the terms of a CC BY NC ND 3.0 IGO licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. WIDER The World Institute for Development Economics Research established in 1984 started work in Helsinki in 1985 with the financial support of the Government of Finland. The principal purpose of the Institute is to help identify and meet the need for policy oriented socio economic research on pressing global and development problems and their inter relationships. WIDER's research projects are grouped into three main themes: hunger and poverty, money finance and trade and development and technological transformation. Volume II deals with famine prevention, paying particular attention to sub Saharan Africa. The topics covered include the problems of early warning and early action, the politics of famine prevention, the influence of market responses, the role of cash support and employment provision in protecting threatened food entitlements and long term issues of reduction of famine vulnerability. In addition to general analyses, the book contains a number of case studies of failures and successes in famine prevention both in South Asia and in sub Saharan Africa.

Duijzend, Gerald T. O'Mara, 1984 This paper reports the results from some experiments utilizing models of the irrigated agriculture of the Indus Basin of Pakistan. The models are unique in that they integrate agricultural production with a surface water distribution system and a groundwater aquifer system for a large river basin. Each of the models incorporates a special case of two level hierarchical decision making with the policy maker, the government and policy receivers, farmers in the analysis of agricultural production response. The models are mostly configured in a long run comparative statistical mode and include endogenous private investment in tubewells and tractors. These tools were designed for evaluation of investment projects and programs and assessment of irrigation system.
