Design and Development of Metal-Forming Processes and Products Aided by Finite Element Simulation Ming Wang Fu, 2016-10-22 This book presents state of the art research on forming processes and formed metal product development aided by the Finite Element Method FEM Using extensive and informative illustrations tables and photographs it systematically presents real life case studies and established findings regarding various forming processes and methods aided by FEM simulation and addresses various issues related to metal formed part design process determination die design and die service life analysis and prolongation as well as product quality assurance and improvement Metal forming has been widely used in many industries This traditional manufacturing process however has long been linked to many years of apprenticeship and skilled craftsmanship and its conventional design and development paradigm appeared to involve more know how and trial and error than in depth scientific calculation analysis and simulation The design paradigm for forming processes and metal formed product development thus cannot meet the current demands for short development lead times low production costs and high product quality With the advent of numerical simulation technologies the design and development of forming processes and metal formed products are carried out with the aid of FEM simulation allowing all the potential design spaces to be identified and evaluated and the best design to ultimately be determined and implemented Such a design and development paradigm aims at ensuring designing right the first time and reducing the need for trial and error in the workshop This book provides postgraduates manufacturing engineers and professionals in this field with an in depth understanding of the design process and sufficient knowledge to support metal formed part design forming process determination tooling design and product quality assurance and control via FEM simulation p

Structural Design of Interlocking Concrete Block Pavements Arjun Siva Rathan R.T, Sunitha V, 2024-07-30 This book focuses on the structural design of Interlocking Concrete Block Pavement ICBP including application analysis design construction and the fundamental design concept of ICBP backed by case studies to demonstrate long term performance of ICBP It helps to draw conclusions regarding the various geometric properties that must be applied to achieve the performance of ICBP Features Promotes the use of ICBP in the construction of pavements Provides a comprehensive overview of concrete block paving Discusses specifications from codes like ASCE 58 16 ASTM BS and IRC codes and datasets online Includes chapters on choosing the materials and designing the type and the shape of the concrete block and the thickness of all layers of the pavement Lists appropriate stipulated values for the various geometric properties Aids in understanding the history and comprehensive application of ICBP This book is aimed at graduate students and researchers in pavement and civil engineering

Issues and Applications of Case-Based Reasoning to Design Mary Lou Maher, Pearl Pu, 2014-02-25 Design is believed to be one of the most interesting and challenging problem solving activities ever facing artificial intelligence AI researchers Knowledge based systems using rule based and model based reasoning techniques have been applied to build design automation and or

design decision support systems Although such systems have met with some success difficulties have been encountered in terms of formalizing such generalized design experiences as rules logic and domain models Recently researchers have been exploring the idea of using case based reasoning CBR techniques to complement or replace other approaches to design support CBR can be considered as an alternative to paradigms such as rule based and model based reasoning Rule based expert systems capture knowledge in the form of if then rules which are usually identified by a domain expert Model based reasoning aims at formulating knowledge in the form of principles to cover the various aspects of a problem domain These principles which are more general than if then rules comprise a model which an expert system may use to solve problems Model based reasoning MBR is sometimes called reasoning from first principles Instead of generalizing knowledge into rules or models CBR is an experience based method Thus specific cases corresponding to prior problem solving experiences comprise the main knowledge sources in a CBR system This volume includes a collection of chapters that describe specific projects in which case based reasoning is the focus for the representation and reasoning in a particular design domain The chapters provide a broad spectrum of applications and issues in applying and extending the concept of CBR to design Each chapter provides its own introduction to CBR concepts and principles

Quantification of Building Seismic Performance Factors ,2009 This report describes a recommended methodology for reliably quantifying building system performance and response parameters for use in seismic design The recommended methodology referred to herein as the Methodology provides a rational basis for establishing global seismic performance factors SPFs including the response modification coefficient R factor the system overstrength factor and deflection amplification factor Cd of new seismic force resisting systems proposed for inclusion in model building codes The purpose of this Methodology is to provide a rational basis for determining building seismic performance factors that when properly implemented in the seismic design process will result in equivalent safety against collapse in an earthquake comparable to the inherent safety against collapse intended by current seismic codes for buildings with different seismic force resisting systems
