The Developmental Logic of Social Systems Henry Teune,Zdravko Mlinar,1978-08-01 Addresses the fundamental structures and processes of social change in the tradition of grand social theory At a time when development has come into question both as theoretical concept and as policy goal this theoretical analysis makes a sharp distinction between growth and development and reasserts the centrality of development for understanding macro historical change in a global perspective they do have interesting closely argued and provocative ideas concerning developmental change Their opening sections detailing their general stance and systems theoretic approach are excellently constructed luring the reader to read on with genuine interest American Political Science Review Vol 73 No 4 *Pure Strategy* Everett Dolman,2012-11-12 A stimulating new inquiry into the fundamental truth of strategy its purpose place utility and value This new study is animated by a startling realization the concept of strategic victory must be summarily discarded This is not to say that victory has no place in strategy or strategic planning The outcome of battles and campaigns are variables within the strategist s plan but victory is a concept that has no meaning there To the tactical and operational planner wars are indeed won and lost and the difference is plain Success is measurable failure is obvious In contrast the pure strategist understands that war is but one aspect of social and political competition an ongoing interaction that has no finality Strategy therefore connects the conduct of war with the intent of politics It shapes and guides military means in anticipation of a panoply of possible coming events In the process strategy changes the context within which events will happen In this new book we see clearly that the goal of strategy is not to culminate events to establish finality in the discourse between states but to continue them to influence state discourse in such a way that it will go forward on favorable terms For continue it will This book will provoke debate and stimulate new thinking across the field and strategic studies **Journal of Human Services Abstracts** ,1980

Impacts Kurt Finsterbusch,1980-10 The book clearly fills a void in the field of social impact assessment and should be well received by researchers involved in the field One particularly strong point of the book is the presentation and review of studies that have not been published previously in readily accessible forms e g agency reports project reports etc There is a wealth of information in such sources and Finsterbusch has done us a service by making some of this material available here Organization Studies Vol 3 No 4 1982 The book s main contribution is the enormous amount and variety of data included in
