The Gene A Critical History:

The Gene Elof Axel Carlson,1966 **That High Design Of Purest Gold: A Critical History Of The Pharmaceutical Industry, 1880-2020** Graham Dutfield,2020-11-11 This book is a history of medicines and the commercial actors that make and sell them covering the 140 years since the modern pharmaceutical industry came into being It is written in a lively and accessible way aiming at a general audience that combines historical narrative with fascinating case studies on drug discovery and commercialization from the rat poison that became warfarin to a cardiovascular treatment that was turned into Viagra In a non partisan way it also examines some of the less noble manifestations of corporate behavior concluding with an agenda for reform It is hard to think of anything nobler than to bring to the world a medicine that saves lives And over 140 years of history the pharmaceutical industry has produced a range of remarkable products albeit typically with external scientific and financial support Making medicines is a very big and profit driven business and the industry does not always make the right products for the right people or at the right prices The industry wields immense power over lives and economies How has it risen to this position of dominance Are the interests of the industry and the public in balance What should we admire about the industry What should we criticise and seek to change The importance of this book lies in the fact that we are all stakeholders in this industry whether or not we own shares so we all need answers to these questions Related Link s **A Critical History of Psychology** Thomas Hardy Leahey,2025-05-27 This fully updated and refreshed 9th edition places social economic and political forces of change alongside psychology s internal theoretical and empirical arguments It utilizes a critical lens to illuminate the way in which the external world has shaped the development of psychology and in turn how psychology from antiquity to modernity has shaped society The text approaches the material from an integrative rather than wholly linear perspective carefully examining how issues in psychology reflect and affect concepts that lie outside the field of psychology s technical concerns as a science and profession Key features of this edition include A newly reconsidered structure including five additional interludes exploring historical background narratives and the rise of modernity to allow for flexible and adaptable textbook use Expanded exploration of the two psychologies the Way of Ideas driven by epistemology and unique to Europe and The Way of Human Nature a universal concern to find a science of human behavior and its management Including scientific applied and professional psychology as well as coverage of the social sciences and social policy implications this book is appropriate for high level undergraduate and graduate students **The Gene** Henry N. Wagner,1966 *A Critical History of the Doctrine of a Future Life* William Rounseville Alger,Ezra Abbot,1871 **A Critical History of the Late American War** Asa Mahan,1877 Narrative and Critical History of America Justin Winsor,1888 **Narrative and Critical History of America: English explorations and settlements in North America, 1497-1689.
