## **The Global Age:**

*The Global Age* Martin Albrow, 1997 Taking issue with those who see recent social transformations as an extension of modernity the author contends that social theory must confront an epochal change from the modern era to a new era of globality in which human beings can conceive of forces at work on a global scale and in which they espouse values that take the globe as their reference point The book begins by assessing the problems of writing about modernity showing how narratives of an endlessly self perpetuating modern age were intrinsic to the modern project the attempt by Enlightenment philosophers to transform the everyday world in accord with science and logic under the auspices of the nation state Now we are beginning to realize that the nation state and the modern project cannot renew themselves endlessly through expansion Instead the author contends the age has culminated in its own dissolution and globality has supplanted modernity as the basis for action and social organization In theorizing the global age he considers the worldwide environmental consequences of aggregate human activities the reconception of human security in the age of nuclear weapons technological advances in communication systems the rise of a global economy and the growing reflexivity of global consciousness as people and groups begin to refer to the globe as the frame for their beliefs The book concludes by examining the consequences of the Global Age thesis for politics identifying a new popular construction of the state that the author terms performative citizenship In the modern age the nation state was the central power and citizens were beneficiaries of that power with rights and duties In the global age citizens respond to the lack of central power by creating or performing the state themselves The global managerial class uses the skills learned in the bureaucracy of the nation state to bring pressure on national governments in the interests of global economic environmental or human rights issues

**The Global Age-Friendly Community Movement** Philip B. Stafford, 2018-10-19 The age friendly community movement is a global phenomenon currently growing with the support of the WHO and multiple international and national organizations in the field of aging Drawing on an extensive collection of international case studies this volume provides an introduction to the movement The contributors both researchers and practitioners touch on a number of current tensions and issues in the movement and offer a wide ranging set of recommendations for advancing age friendly community development The book concludes with a call for a radical transformation of a medical and lifestyle model of aging into a relational model of health and social individual wellbeing

**Global Age-friendly Cities** World Health Organization, 2007 The guide is aimed primarily at urban planners but older citizens can use it to monitor progress towards more age friendly cities At its heart is a checklist of age friendly features For example an age friendly city has sufficient public benches that are well situated well maintained and safe as well as sufficient public toilets that are clean secure accessible by people with disabilities and well indicated Other key features of an age friendly city include well maintained and well lit sidewalks public buildings that are fully accessible to people with disabilities city bus drivers who wait until older people are seated before starting off and

priority seating on buses enough reserved parking spots for people with disabilities housing integrated in the community that accommodates changing needs and abilities as people grow older friendly personalized service and information instead of automated answering services easy to read written information in plain language public and commercial services and stores in neighbourhoods close to where people live rather than concentrated outside the city and a civic culture that respects and includes older persons

**The Global Age**, 2012-02-29 [Review about Gregg Bradens "Fractal Time". A Clue to Human History](#)

Felix Ale, 2015-02-09 Literature Review from the year 2014 in the subject American Studies Literature grade A Atlantic International University course PhD JOURNALISM language English abstract The book Fractal Time The Secret of 2012 and the New World Age by Gregg Braden explores the discoveries of time as the means of communication from the past In addition the book proposes that time defines the map to an individual's future and provides a picture of the world to come The Mayans identify December 21 2012 as the end of the world age particularly to be attributed to the Winter solstice The cycle is predicted to have started in the 5th world age that is approximately 3114 B.C. This defines 1800 years prior the time of the exodus of Moses which is around 5125 years ago Parallel to the world age the traditions of the Indians were passing on through oral traditions thus they may have lost their accuracy along the transmission Therefore the oral communications are dated back before the literature

**Welfare States** Eric S. Einhorn, John Logue, 2003-07-30 Einhorn and Logue analyze the political economic and social challenges facing five small affluent and advanced industrial democracies in Scandinavia Denmark Finland Iceland Norway and Sweden Updated and expanded from its successful predecessor this edition emphasizes how global and European developments have affected democratic policymaking in areas such as Social welfare policy Employment policy Labor relations Economic policy Social change A comprehensive yet accessible survey of political history governmental institutions policymaking political parties interest groups political culture and foreign relations is also included The comparative and interdisciplinary focus makes this a stimulating source of ideas for anyone interested in democracy and social justice in the

global era     **The Global Art World** Hans Belting,Emanoel Araújo,2009 This is the second publication from the ongoing research series Global Art and the Museum GAM which was initiated in 2001 by German art historian Hans Belting and artist writer and curator Peter Weibel at the ZKM Center for Art and Media in Karlsruhe Germany The last 20 years have seen a rapid globalization of the art world resulting in geographic decentralization and a shift away from a primarily Western perspective GAM s aim is to analyze the effect of these changes on the art market museums and art criticism This volume comprises a collection of essays by experts such as Claude Arduin Keeper of the African Section of London s British Museum Koeki Claessens Director of Central Africa s Royal Museum and Eugene Tan Director of the Institute of Contemporary Arts Singapore who presented at the 2007 conference

**World of Work ,1993      The World of Drinks**

**and Drinking** John Doxat,1972     *Place Matters* Peter Dreier,John H. Mollenkopf,Todd Swanstrom,2001 The central thesis of Place Matters is that economic segregation between rich and poor and the growing sprawl of American cities and suburbs are not solely the result of individual choices in free markets Rather these problems have been powerfully shaped by short sighted government policies

**International Educator ,2004      Will America Grow Up Before it Grows Old?** Peter G.

Peterson,1996 The facts are plain Social Security is headed for massive unsustainable deficits in the next century Politicians talk of a Social security trust fund but there are no hard assets in it only government bonds The reality is that Social Security is really a pay as you go system with benefits to current retirees paid not out any saved trust funds but out of taxes on the payroll of today s workforce But what will happen when these employees retire when in less than fifteen years the 76 million members of the baby boom generation the largest in our history stop paying in and start taking money out And what can we as individuals and as citizens do now to prevent these catastrophic deficits The crises towards which we are careening by 2025 1 American in 5 will be 65 or older and it will take an already overloaded 1 6 working Americans to support each retired person will not only be felt personally by the many millions stranded with no savings and without benefits but will shiver the country s economy as a whole as well as the world financial system With courage clarity and incontrovertible evidence Peterson spells out this huge if politically unmentionable problem more clearly than ever before and tells us what we must do now for our personal survival and that of our children According to recent polls more young Americans believe in UFOs than think they will ever receive a Social Security check Yet most Baby Boomers as they approach retirement age believe they will continue to live their present lifestyle in retirement without a fraction of the personal savings or pensions necessary to pay for the future they expect This agingpopulation double today s load will depend on as few as 1 6 working Americans to support each retired person Who will support this nation of Floridas In this short powerful book Peter G Peterson one of American s top investment bankers and a leading critic of our entitlement policy spells out in the clearest possible language with unmistakable numbers and easy to read charts the disaster that lies ahead if we continue to ignore our low saving rate our ballooning federal deficits and our enormous unfunded and unsustainable commitments to retirees

Peterson reveals what politicians are afraid to admit trillions of dollars of promised benefits for which no funds have been provided Shattering the myths surrounding this subject with hard facts and eye opening views of the future Peterson gives the most comprehensive and candid plan for a gradual humane fair and realistic answer to the greatest challenge of the next century transforming our political economic cultural and social assumptions to adapt to the realities of the graying of

America **Liberal Democracy Into the Twenty-first Century** Roland Axtmann,1996 This book offers a contemporary critique of liberal democracy understood as a set of institutions and as a set of ideas Roland Axtmann asks what democracy means today as it faces the challenges of feminism multiculturalism globalization and European integration Axtmann analyses in turn each of liberal democracy s component parts Firstly he discusses the notions of sovereignty constitutionalism and representation and analyses the liberal concept of citizenship Secondly he surveys the conceptual history of civil society and presents republicanism and deliberative politics after Habermas as alternative conceptualizations of democracy Thirdly he shows how feminism and multi culturalism challenge liberal democracy with their demands for the granting of group rights Finally he shows how global interdependence and supranational integration demand a reconsideration of democratic sovereignty The idea of democratic rule by the sovereign people in the sovereign nation state is being transformed to reflect new connections between citizens governments and supranational institutions
