The God Gene How Faith Is Hardwired Into Our Genes:

The God Gene Dean H. Hamer, 2005-09-27 The overwhelming majority of Americans believe in God this conviction has existed since the beginning of recorded time and is shared by billions around the world In *The God Gene* Dr Dean Hamer reveals that this inclination towards religious faith is in good measure due to our genes and may even offer an evolutionary advantage by reducing stress preventing disease and extending life Popular science at its best *The God Gene* is an in depth fully accessible inquiry into research that can change the way we see ourselves and the world around us Written with balance integrity and admirable scientific objectivity this is a book for readers of science and religion alike Fascinating A compelling case that spirituality very well may be part and parcel of our genetic structure Los Angeles Times Challenges some basic assumptions we may have and certainly goads us into reflection about human nature The News Observer *Religie als sociale constructie. Een menswetenschappelijke rondleiding* Guido Dierickx, 2015-09-07 De religie geeft aanleiding tot vele vaak heftige debatten in academische en minder academische kringen Bij nader toezien gaan die debatten meestal over de sociale constructie die de religieuze beleving bevordert of verzwakt en niet over de kern van de religie de religieuze beleving Ze gaan over de omstandigheden die de participatie aan de religieuze gemeenschap en cultuur ondersteunen of hinderen die haar geloofwaardigheid ondermijnen of bevestigen Dit werk wil een aantal van die debatten verhelderen met behulp van een sociologische zienswijze en de beschikbare empirische gegevens Daarmee is alvast n thema aangestipt dat herhaaldelijk zal weerkeren het onderscheid tussen de theologische en de filosofische zienswijze en de sociologische en de menswetenschappelijke De stelling van de auteur luidt dat in debatten over religie de theologisch filosofische zienswijze zij het vaak in haar ge vulgariseerde vorm te veel aan bod komt en de sociologische te weinig Dit geldt paradoxaal genoeg zowel voor de vrienden als voor de vijanden van de religie Dat is begrijpelijk omdat levensbeschouwelijke debatten nu eenmaal heet zijn en meer aantrekkingskracht hebben dan menswetenschappelijke debatten die veeleer koel zijn *Creation Hypothesis in the Anthropocene Epoch* Andrzej Kaczmarczyk, 2018-08-06 This book is a discourse on creation hypothesis in light of new scientific findings made in the 20th and 21st centuries incorporating sacred texts of different religions It also addresses the universal phenomena of information and mathematics within this context The discourse makes an important contribution to the ongoing conversation about creationism intelligent design and the problems of science vs religion *Psychology, Religion, and Spirituality* Fraser Watts, 2017-03-06 This book gives an up to date overview and evaluation of what psychology tells us about religious beliefs practices and experiences **Man's Fate and God's Choice** Bhimeswara Challa, 2021-06-29 Stagnate as a creepy caterpillar or transform into a beautiful butterfly this path breaking book of a rare genre suggests is the seminal choice before mankind and every one of us In this setting the book raises some fundamental questions What is man's rightful place in the cosmos and his manifest destiny on earth Why are we so self righteously self destructive Are we a doomed species Or divine beings struggling to overcome the hubris of the human intellect Is God getting weary of mankind

How should we synergize human effort and Divine Grace The book posits that any betterment in human behavior needs a cathartic change at the deepest levels That requires diluting the dominance of the mind and reawakening the long dormant intelligence of the human heart To meet that challenge we need minimum numbers a critical mass to create self sustained momentum for transformation through consciousness change And every single human of this generation should behave in such a way that he or she is that single person whose transformation could make the decisive species scale difference The book offers a menu of ideas and an agenda of action This book could be itself become an input to mobilize that very critical mass it advocates for human transformation Well planned and cohesively written the book is noteworthy for its delightful blend of information and arguments and reveals the depth of the author s understanding of the human predicament This is a closely argued and thought provoking book The Hindu 13 Sept 2011 This book is a gripping exposition on human nature and self transformation without preference to religion Challa has critically provided a foundational argument for a deeper discussion of philosophical and practical ideals concerning self transformation harmonizing the head and the heart is the way for humans to function as spiritual beings Recommended by the USR The US Review of Books The author reflects upon the crisis of contemporary civilizations and outlines a blueprint for a new world order based on progressive spiritual values and change of human consciousness The strength of this treatise is the sweep of Challa s reach and his treatment of a vastly complex set of issues that bedevil humankind today India International Center Quarterly Summer 2012 As a thinker and erudite scholar the author has made a profound study of the world situation and the moral decadence of man This book deserves to be on the shelves of university college and public libraries Triveni Magazine July Sept 2011 It is difficult to pigeon hole this book as a prophetic discourse a journey into the human mind a guide for human survival a spiritual treatise It is an amalgam of all these and more the volume reaches out to those who are already uneasy about the way we on this earth are progressing The Book Review India June 2013 *Religion Today* Ross Aden,Chris A. Kramer,2024-07-02 Religion Today introduces students to key concepts in religious studies through a compelling problem solving framework Each chapter opens with a contemporary case study that helps students engage in current religious issues explore possible solutions to difficult religious problems today and learn key themes and concepts in religious studies To enhance student learning a free Student Study Guide is available for download from Rowman Littlefield The Study Guide features chapter summaries definition quizzes for students to test themselves on key terms and possible learning activities *What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement* D. John Doyle,2018-09-01 This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm In the book the author critically examines technologies such as genetic engineering neural implants pharmacologic enhancement and cryonic suspension from transhumanist and bioconservative positions focusing primarily on moral issues and what it means to be a human in a

setting where technological interventions sometimes impact strongly on our humanity The author also introduces the notion that death is a process rather than an event as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement Written by a physician scientist and heavily referenced to the peer reviewed medical and scientific literature the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side reading No prior knowledge of moral philosophy is assumed as the various key approaches to moral philosophy are outlined early in the book

The Nature of Our Humanity Paul T. Jersild, 2009 This book addresses a current frontline issue in the perennial exchange between science and religion Jersild surveys the contemporary scene in genetic research and the visionary goals of a number of scientists concerning the human future He focuses on human identity Who Are We as the critical question first addressing our biological origins in light of evolution and presenting a holistic understanding of human nature He then turns to the world of biotechnology and the tension between human limitations and human potential in light of prospective genetic enhancements The implications of genetic engineering the impact of pharmacology and the human desire for perfection and immortality all enter into a volatile mix of ideas and aspirations concerning the human future Jersild brings a Christian perspective to these developments in spelling out a responsible stance

Harvard Divinity Bulletin Harvard Divinity School, 2007 Atheism Advanced David Eller, 2007 An anthropological and philosophical deconstruction of religion religious language and the danger of relying on belief or faith instead of knowledge Atheism is shown to lead to discredism a rejection of belief as well as a rejection of gods
