Writing the Literature Review Sara Efrat Efron, Ruth Ravid, 2018-11-14 What is a literature review Different orientations to a literature review Choosing a review topic and formulating a research question Locating and organizing research sources Selecting analyzing and keeping notes of sources Evaluating research articles Structuring and organizing the literature review Developing arguments and supporting claims Synthesizing and interpreting the literature The writer voice and the writing process Acknowledging sources citations quotations and plagiarism Putting it all together The eye and brain in macaque and man: Linear, areal and volumetric dimensions. With added miscellaneous data on eye and brain in macaque and man, and added dimensional data on eye and brain in non-primates ERIK C CORTHOUT ,2014-04-07 This book determines representative values for dimensional parameters of the eye and brain in extant Homo modern man and Macaca Macaca fascicularis Macaca mulatta and Macaca nemestrina Indeed published values in the scientific literature for the dimensions of each of these organs in each of these species differ greatly between studies mean values published for a single parameter in a single species can differ by a factor of 1.25 for linear dimensions a factor of 3 for areal dimensions and a factor of 1.5 for volumetric dimensions This book provides 3 progressive sets of information First Elementary Tables provide raw databases lists of published values Second text in Chapters and Addenda provide new insights critical analysis of these published values and subsequent synthesis of representative values Third Chapter Summary Tables and Book Summary Tables provide distilled databases lists of these representative values This book is an unprecedented reference work both because of the large number of published values in its raw databases and because of the well founded size of the representative values in its distilled databases This book is a comparative comprehensive and critical review of published data comparative as it reviews data for man and macaques comprehensive as it reviews data in a record number critical as it reviews data with analysis and synthesis Anyone can easily consult the 7 Chapter Summary Tables or the 3 Book Summary Tables for concise lists of representative values Those who require more elaborate information can also consult the 100 pages of Elementary Tables or read the 200 pages of text in Chapters and Addenda This remarkable book reports the results of an exhaustive meticulous and exceedingly thorough review of the complete published literature on the dimensions of eye and brain in three species of macaque monkey and man Why would anyone be interested in this The measurements of linear areal and volumetric dimensions of eye and brain constitute necessary building blocks to derive profound implications for information processing which is of great interest to a wide variety of scientists It might appear unbelievable for someone who does not belong to these fields of research but the reported values differ greatly between studies sometimes up to a factor 3 This book reports the important values in succinct tables but also provides a critical analysis and synthesis of the literature which is a substantial contribution to neuro anatomy and neuro histology in its own right Sure to stand the test of time it will be on the shelves of a great many neuroscientists for years to come and many serious scientists from other disciplines will

consult its content when it turns out to be the cornerstone of truly innovative and groundbreaking new theoretical claims on how the brain works Watch out for more to come by the same author Prof dr Johan Wagemans Faculty of Psychology and Educational Sciences KU Leuven Belgium This impressive piece of work provides a very detailed and comprehensive review of various anatomical measures of the eye and the brain of humans and macaque monkeys It lists what is known about the physical dimensions of eye and brain and more so shows how much we still need to learn about these important organs Prof dr Rufin Vogels Department of Neurosciences KU Leuven Belgium

Adopting the Track of Term: An Emotional Symphony within **Novel Summary Chapter Quotes**

In some sort of consumed by screens and the ceaseless chatter of quick interaction, the melodic elegance and mental symphony created by the written term frequently fade in to the backdrop, eclipsed by the persistent noise and disruptions that permeate our lives. However, nestled within the pages of **Novel Summary Chapter Quotes** a wonderful fictional prize overflowing with fresh thoughts, lies an immersive symphony waiting to be embraced. Constructed by an elegant composer of language, that charming masterpiece conducts visitors on a psychological trip, well unraveling the hidden songs and profound influence resonating within each cautiously constructed phrase. Within the depths with this poignant analysis, we can discover the book is central harmonies, analyze its enthralling publishing type, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
