Strategic War Termination:

Confrontation, Strategy and War Termination Christopher Tuck, 2016-05-23 At the heart of this book is the problem of war termination Britain won an almost unbroken string of tactical military victories during an undeclared war against the Republic of Indonesia in the 1960s yet it proved difficult to translate this into strategic success Using conflict termination theories this book argues that British strategy during Confrontation was both exemplary and flawed both of which need not be mutually exclusive The British experience in Indonesia represents an illuminating case study of the difficulties associated with strategy and the successful termination of conflicts The value of this book lies in two areas as a contribution to the literature on British counter insurgency operations and as a contribution to the debates on the problems of war termination in the context of strategic thought

Conflict Termination And Military Strategy Stephen J. Cimbala, 2019-04-10 Although considerable attention has been paid to deterrence theory and crisis management the equally important topic of ending wars has been virtually ignored Conflict termination is the stepchild of U S strategy for a number of reasons Thinking about how wars should end presupposes acceptance of the fact that war especially nuclear war is possible Further analyzing options for ending conflicts implies less than total victory a concept that not only runs counter to the U S approach to warfare but also raises the specter of limited war an approach that fell into disfavor following Korea and Vietnam Finally defining conflict termination objectives assumes that we think more about ends than means that we know what is important to us and why and thus understand the risks we will accept to defend specific interests and objectives The contributors examine a wide variety of topics ranging from Soviet and U S views on conflict termination to past present and future U S military service contributions Their aim is to demonstrate the importance of careful evaluation of conflict termination goals during peacetime because when war begins passions and emotions will cloud decisionmaking

Beyond Guns and Steel Dominic J. Caraccilo, 2011-01-19 This work is a doctrinal examination of war termination strategy and conflict resolution as a dependent pair requiring a plan to achieve both in unison in advance of a fight The necessity of a plan for conflict resolution should be intuitively obvious for policymakers yet a survey of recent conflicts including Afghanistan and Iraq shows that not to be the case *Beyond Guns and Steel* A War Termination Strategy provides a practical approach to establishing a plan for war termination and conflict resolution before the bullets fly In explaining the difference between strategy and policy Colonel Dominic J Caraccilo clarifies the most important and often the most constraining element of a nation s power its resources He posits that termination strategy and conflict resolution are interdependent and need to be included in conflict plans from the outset Caraccilo s book fills a void in current strategy for the development of long term plans that bring conflicts to timely and acceptable conclusions providing a methodology that allows interagency requirements and resources for war termination to be defined allocated and employed effectively

Strategic War Termination Stephen J. Cimbala, 1986-11-18 The first book to analyze strategic war termination from a policy perspective *Strategic War Termination* explores present US policy on

termination and recommends strategies for improving it Taking into account the impact of new weapons technologies adversaries expectations and counter command attacks this unique work examines methods for deterrence of global protracted and nuclear wars as well as the conduct and termination of them Timely and provocative Strategic War Termination explains what policy is and should be on this pressing subject *Conflict Termination in Europe* Stephen J. Cimbala,1990-10-30 An important contribution to the international relations and military studies literature this study considers the problem of conflict termination in Europe an area of immense strategic importance to both the United States and the Soviet Union The author argues that a well thought out policy for conflict termination is lacking within the NATO alliance which currently relies almost exclusively on policies that emphasize the prevention of war This lack of a conflict termination strategy Cimbala asserts leaves nations open to the danger of a quickly escalating nuclear conflict should prevention policies fail and a war in Europe actually occur In developing his arguments Cimbala considers the relationship between war and politics as perceived by Soviet and Western planners compares the superpowers likely views on the process of escalation and assesses the command control and communications perspectives implicit in Soviet and American writings and deployments and their implications for war termination Cimbala begins with an overview of the problems and choices involved in ending war in Europe under contemporary conditions Subsequent chapters examine such topics as the philosophical and practical issues related to the problem of preemption the problem of military stability and its specific applications to modern Europe and Western and Soviet approaches to the escalation and limitation of war Soviet perspectives on command and control as well as the Soviet view of war termination receive extended treatment in two chapters Finally Cimbala contrasts the orthodox view of mutual assured destruction with the strategic revisionism of defense dominance or mutual assured survival He concludes that policymakers and military planners must recognize that nuclear weapons will almost certainly be a part of any war in Europe and that termination must focus on limiting the use of these weapons before the pressures of in the field escalation tendencies begin to work against the early conclusion of a conflict Students and scholars of military policy will find Cimbala s work enlightening and provocative reading **Victory in Europe, 1945** Arnold A. Offner, Theodore A. Wilson,2000 In this collection senior scholars explore the transition from war to uneasy peace how and why the war ended as it did whether a different resolution was possible and if the ensuing Cold War was inevitable **Deciding on Defeat** Soul Park,2015 **How Wars End** William Thornton Rickert Fox,1970 **NATO Strategy and Nuclear Escalation** Stephen J. Cimbala,1989 In this analysis of key doctrines plans and policies at the centre of the controversy about Western deterrence and defence the author points to doctrinal deficiencies and examines NATO ideas on escalation and policy in terms of both logical consistency and implication for strategy **Conflict Termination and Military Strategy** ,1994 Terminating a conflict under favorable conditions has been one of the most difficult tasks facing our nation s political and military leaders Too frequently history has shown that our fighting forces have been

committed to conflicts in which there is no clear vision of the desired end state or without military objectives that will help achieve national aims This paper examines the role of military strategy in conflict termination While U S military doctrine now links the strategic political aims of war and the battlefield tactical engagement the military will continue to face a difficult task in formulating conflict termination strategies due to the lack of specificity in our national security strategy Given this conclusion and the increasing complexity and frequency of conflicts in the post Cold war environment additional conflict termination guidance is required in U S military doctrine Conflict termination Military strategy **War Termination Concepts and Political, Economic and Military Targeting** James E. Dornan,1978 **Grand Strategy: Oct. 1944-Aug. 1945, by J. Ehrman** Norman Henry Gibbs,1956 War Termination William J. Lademan,Naval War College (U.S.),1988 *Operational Art in Limited War Termination: The Bridge Between the Strategic and Operational Levels of War* ,1994 The effective application of operational art is critical to the successful termination of a limited war by the U S Despite this role guidance regarding the application of operational art to termination in a limited war is meager This paper focuses on the high level bridge between the strategic and operational levels that is necessary to achieve successful termination Theoretical synopses regarding the unique characteristics of limited war war termination theory and negotiating theory are provided Practical issues steps regarding the bridge from the strategic to the operational level are explored based upon the noted theories The validity of the practical thought in the paper is tested through an examination of termination in the Korean War Based upon arguments in the paper it is clear that successful termination in a limited war cannot be achieved without the effective application of operational art at the strategic operational level of war It is also clear that the operational commander is uniquely positioned to review the ability of the military instrument to deliver the political object Recommendations entail an expansion of doctrine to include a broader discussion of war termination issues War termination Limited war Operational art Strategy Operational commander Strategic Surprise for War Termination Richard K. Betts,Klaus Knorr,Patrick M. Morgan,1983 *Colossus Reborn* David M. Glantz,2005 Beyond the battles themselves Glantz also presents an in depth portrait of the Red Army as an evolving military institution Assessing more clearly than ever before the army s size strength and force structure he provides keen insights into its doctrine strategy tactics weaponry training officer corps and political leadership In the process he puts a human face on the Red Army s commanders and soldiers including women and those who served in units security NKVD engineer railroad auto transport construction and penal forces that have till now remained poorly understood BOOK JACKET War Termination: A Bridge Too Short: Considerations for the Operational Commander ,1997 War termination strategies are not an issue of whether or not the nation should devote sufficient military means to achieve the chosen political objectives Conflict termination involves more than simply ending hostilities It is a matter of effective coordination in development of objectives and strategies while at the same time linking the political leadership and the military commander to achieve the ends with the appropriate means The

American approach to military strategy has had a tendency to sever the links between military action and political objectives and American military strategy has largely been awkward in its contribution towards achieving a better and lasting peace. This is in part due to having insufficient doctrinal guidance to achieve the ends as described by the policy maker. It is also because current doctrine and policy does not cause us to think through the implications of successfully achieving our objectives. The operational commander must be skilled in maintaining a balance of military force and diplomatic initiation to preserve and reinforce our political objectives while at the same time working the concerns of a defeated enemy or enemies to prohibit part two of the same conflict.

Planning for Conflict Termination Bruce W. Sudduth, 1997 Joint Pub 3 0 identifies the need to plan for conflict termination but our experiences in conflict demonstrate that more comprehensive planning needs to be done in terminating conflicts. The strategic outcome of the Gulf War reveals deficiencies in conflict termination planning. The Japanese planning in the Russo Japanese War evidenced a clear strategy for ending that conflict. Examination of these experiences provides lessons we can use to improve planning for conflict termination. This is an area where most planning staffs do not concentrate or excel. Our primary focus has been and is the military victory which does not ensure the political victory. The role of military strategy in conflict termination is to end the conflict at the least cost and transition to post conflict activities to ensure achievement of the desired end state. With current guidance the military planners will continue to face a difficult task in formulating conflict termination strategies. This paper will present recommendations for planning war termination strategies.

The Strategy of Endings Philip Douglas Brick, 1990

Why Wars End David J. Oberst, Army War College (U.S.), 1992. Although war termination is an essential part of military strategy the subject has received relatively little attention. Despite a burst of interest spurred by the U S experience in Vietnam there is no generally accepted theory to explain the process of ending a war. Beginning with a discussion of the ways in which wars have ended this paper reviews a number of theoretical propositions that have been advanced to explain the conditions necessary for two countries at war to cease hostilities. It views war termination as a rational decision process in which the participants weigh the potential gains of continuing the war against risks and costs. This general proposition is developed into a detailed expected utility model in which the probabilities and utilities of possible settlements and the costs of continuing the war are the key variables. A variety of other factors such as public support and mobilization potential that have been suggested as being key factors influencing war termination decisions are then examined. It is concluded that the impact of all relevant factors can be reflected through their effect on the three basic variables of probability utility and cost. The paper concludes by offering some observations of how the expected utility model could be employed as an analytic framework for developing war termination strategies.
