Strength in Numbers: The Rising of Academic Statistics Departments in the U. S. Alan Agresti, Xiao-Li Meng, 2012-11-02
Statistical science as organized in formal academic departments is relatively new. With a few exceptions, most Statistics and Biostatistics departments have been created within the past 60 years. This book consists of a set of memoirs, one for each department in the U.S. created by the mid 1960s. The memoirs describe key aspects of the department's history, its founding, its growth, key people in its development, success stories such as major research accomplishments, and the occasional failure story. PhD graduates who have had a significant impact, its impact on statistical education, and a summary of where the department stands today and its vision for the future. Read here all about how departments such as at Berkeley, Chicago, Harvard, and Stanford started and how they got to where they are today. The book should also be of interest to scholars in the field of disciplinary history.

The Strength in Numbers Barry Bozeman, Jan Youtie, 2020-07-14
Why collaborations in STEM fields succeed or fail and how to ensure success. Once upon a time it was the lone scientist who achieved brilliant breakthroughs. No longer. Today science is done in teams of as many as hundreds of researchers who may be scattered across continents. These collaborations can be powerful, but they also demand new ways of thinking. *The Strength in Numbers* illuminates the nascent science of team science by synthesizing the results of the most far-reaching study to date on collaboration among university scientists. Drawing on a national survey with responses from researchers at more than one hundred universities, archival data, and extensive interviews with scientists and engineers in over a dozen STEM disciplines, Barry Bozeman and Jan Youtie establish a framework for characterizing different collaborations and their outcomes and lay out what they have found to be the gold standard approach: consultative collaboration management. *The Strength in Numbers* is an indispensable guide for scientists interested in maximizing collaborative success. *Census and You*, 1990
