*Power and Resistance*, 7th ed. Jessica Antony, Wayne Antony, 2022-06-30T00:00:00Z Power and Resistance debunks the dominant neoliberal hyper individualist approach to society's problems that sees poverty as a result of laziness

environmental crises as a result of market demands for products that pollute and Indigenous Peoples struggles as a result of not assimilating We argue that it is social inequality and oppression that are the underlying causes of social problems In a society like ours powerful groups make choices that benefit them and force those choices onto others creating life problems for others and society as a whole The powerful also have influence over what is and is not called a social problem Solving social problems requires changing the structures of inequality and oppression For example industrial corporate agriculture has created huge profits for a few gigantic food corporations but left much of the world hungry But farmers and their allies are pushing back through agroecology an agriculture based on local small scale ecologically sustainable farming that brings eaters and growers closer to one another The seventh edition of Power and Resistance includes new chapters on anti Black racism in schools Indigenous people and mental health food security and sovereignty and work in the gig economy

*The 'Poor Child'* Lucy Hopkins, Arathi Sriprakash, 2015-07-16 Why are development discourses of the poor child in need of radical revision What are the theoretical and methodological challenges and possibilities for ethical understandings of childhoods and poverty The poor child at the centre of development activity is often measured against and reformed towards an idealised and globalised child subject This book examines why such normative discourses of childhood are in need of radical revision and explores how development research and practice can work to unsettle the global child It engages the cultural politics of childhood a politics of equality identity and representation as a methodological and theoretical orientation to rethink the relationships between education development and poverty in children's lives This book brings multiple

disciplinary perspectives including cultural studies sociology and film studies into conversation with development studies and

development education in order to provide new ways of approaching and conceptualising the poor child. The researchers draw on a range of methodological frames such as poststructuralist discourse analysis, arts based research, ethnographic studies and textual analysis to unpack the hidden assumptions about children within development discourses. Chapters in this book reveal the diverse ways in which the notion of childhood is understood and enacted in a range of national settings including Kenya, India, Mexico and the United Kingdom. They explore the complex constitution of children's lives through cultural policy and educational practices. The volume's focus on children's experiences and voices shows how children themselves are challenging the representation and material conditions of their lives. *The Poor Child* will be of particular interest to postgraduate students and scholars working in the fields of childhood studies, international and comparative education and development studies.
