The Day of Ahmed's Secret Eileen Yoshina, Voices of Love and Freedom, 1999 **Understanding and Teaching Primary Geography** Simon Catling, Tessa Willy, 2018-06-18 This book outlines how good teaching of primary geography can extend children's world awareness and help them make connections between their environmental and geographical experiences Chapters offer guidance on important learning and teaching issues as well as the use and creation of resources from the school environment to the global context It covers all the key topics in primary geography including understanding places physical and human geography environmental sustainability learning outside the classroom global issues citizenship and social justice Summaries classroom examples and practical and reflective tasks are included throughout to foster understanding and support the effective teaching of primary geography **Teaching Through Texts** Holly

Anderson, Morag Styles, 2002-02-07 Drawing on many popular and literary texts the contributors to this book write with enthusiasm about opportunities for creative teaching and learning and provide many examples of good practice both inside and outside the Literacy Hour **Self-regulation of Learning and Performance** Dale H. Schunk, Barry J.

Zimmerman, 2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage their own learning and achievement efforts through activities that influence the instigation direction and persistence of those efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide theoretical direction to ongoing as well as nascent efforts to explore academic self regulatory processes Since that date there has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first generation of research It also addresses a number of key issues that have arisen since then such as how self regulation differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks
