### **Forgotten Places**

Thomas A. Lyson, William W. Falk, 1993     Seeking Justices Michael Comiskey, 2004 In the long shadows cast by the Robert Bork and Clarence Thomas nominations Supreme Court confirmations remain highly contentious and controversial This is due in part to the Senate's increasing reliance upon a much lengthier much more public and occasionally raucous confirmation process in an effort to curb the potential excesses of executive power created by presidents seeking greater control over the Court's ideological composition Michael Comiskey offers the most comprehensive systematic and optimistic analysis of that process to date Arguing that the process works well and therefore should not be significantly altered Comiskey convincingly counters those critics who view highly contentious confirmation proceedings as the norm Senators have every right and a real obligation he contends to scrutinize the nominees constitutional philosophies He further argues that the media coverage of the Senate's deliberations has worked to improve the level of such scrutiny and that recent presidents have neither exerted excessive influence on the appointment process nor created a politically extreme Court He also examines the ongoing concern over presidential efforts to pack the court concluding that stacking the ideological deck is unlikely As an exception to the rule Comiskey analyzes in depth the Thomas confirmation to explain why it was an aberration offering the most detailed account yet of Thomas's pre judicial professional and political activities He argues that the Senate Judiciary Committee abdicated its responsibilities out of deference to Thomas's race Another of the book's unique features is Comiskey's reassessment of the reputations of twentieth century Supreme Court justices Based on a survey of nearly 300 scholars in constitutional law and politics it shows that the modern confirmation process continues to fill Court vacancies with jurists as capable as those of earlier eras We have now seen the longest period without a turnover on the Court since the early nineteenth century making inevitable the appointment of several new justices following the 2004 presidential election Thus the timing of the publication of Seeking Justices could not be more propitious     The Changing American Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers The Changing American Countryside a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non

metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life     Canadian Climate Normals, 1961-1990: British Columbia Canada. Atmospheric Environment Service,1993 This report is one of a series of products containing the 1961 90 climate normals for over a thousand locations across Canada Included are sites for which there are a least 20 years of data available in the period Stations are grouped by region Climate elements temperature degree days precipitation snow cover sunshine pressure moisture wind are grouped by observing site Sites are listed alphabetically by province This report covers British Columbia     City Schools and City Politics John Portz,Lana Stein,Robin R. Jones,1999 An explanation of why some US cities are better at educational reform than others It relates education to politics showing how the whole village can be mobilized to better educate tomorrow s citizens It is based on an 11 city study of civic capacity and urban education
