*Law and Finance in Historical Perspective* Aldo Musacchio,2005

Do early institutions exert a long term impact on subsequent institutional and economic development Do endowments and legal tradition explain the subsequent development of financial markets and rule of law An influential stream of the economics literature explains development levels around the world using as explanatory variables institutions adopted in the distant past In particular the law and finance literature has argued that legal origin e g civil and common law determines both the extent of investor protections and the level of financial market development of a country La Porta Lopez de Silanes Shleifer and Vishny 1997 1998 2000 Furthermore extensions of this literature have argued that conditions at the time of colonization such as settler mortality are powerful explanatory variables of financial development in ex colonies Beck Demirgu Kunt and Levine 2003 2003b The empirical work of these studies has showed that being a Civil Law country is correlated with having poor protection of investors and small financial markets This dissertation challenges these hypotheses by showing the historical variation in investor protections and equity and bond markets in Brazil a Civil Law country Rather than having legal origin determining these variables I argue that the variation in financial market size responds to international capital cycles while the variance in investor protections is better explained by the historical changes in the interests of ruling coalitions In order to study investor protections I created creditor and shareholder rights indices following the law and finance methodology and looked at their enforcement My analysis of creditor rights and court cases shows that creditor rights in Brazil were relatively strong between 1850 and 1940 The analysis of shareholder protections and corporate ownership demonstrates that shareholder rights got stronger on paper from 1882 to 2001 with a minor setback in the 1990s while equity ownership got increasingly more concentrated after 1940 I end by suggesting that increasing popular participation in financial markets might be a good way to commit governments to protect investors

*Opting for Democracy?* Iain S. MacLean,1999

Liberation theology is often characterized as rejecting democracy and based upon their option for the poor advocating a form of socialism This claim is challenged through an analysis of the works of Brazilian liberation theologians Catholic social teaching and studies on the base community movements in Brazil from the imposition of military rule through democratization 1964 1992 Liberation theologians initially rejected liberal democracy but by the nineties were advocating a participatory and ecological democracy However they differed on how such a democracy was to be achieved in the competitive political party arena In addition increasing ecclesiastical opposition and the collapse of existent socialist regimes marginalized liberation theologians vision of an inclusive participatory democracy
