**The International Migration of Women** Maurice Schiff, Andrew R. Morrison, Mirja Sj blom, 2007-11-12 The current share of women in the world's international migrant population is close to one half. Despite the great number of female migrants and their importance for the development agenda in countries of origin there has until recently been a striking lack of gender analysis in the economic literature on international migration and development. This volume makes a valuable contribution in this context by providing eight new studies focusing on the nexus between gender, international migration and economic development.

**The Economics of Immigration** Cynthia Bansak, Nicole Simpson, Madeline Zavodny, 2020-11-26 This book in its second edition introduces readers to the economics of immigration which is a booming field within economics. The main themes and objectives of the book are for readers to understand the decision to migrate, the impacts of immigration on markets and government budgets, and the consequences of immigration policies in a global context. Our goal is for readers to be able to make informed economic arguments about key issues related to immigration around the world. This book applies economic tools to the topic of immigration to answer questions like whether immigration raises or lowers the standard of living of people in a country. The book examines many other consequences of immigration as well such as the effect on tax revenues and government expenditures, the effect on how and what firms decide to produce, and the effect on income inequality to name just a few. It also examines questions like what determines whether people choose to move and where they decide to go. It even examines how immigration affects the ethnic diversity of restaurants and financial markets. Readers will learn how to apply economic tools to the topic of immigration. Immigration is frequently in the news as more people move around the world to work, to study, and to join family members. The economics of immigration has important policy implications. Immigration policy is controversial in many countries. This book explains why this is so and equips the reader to understand and contribute to policy debates on this important topic.

**Neurology in Migrants and Refugees** Mustapha El Alaoui-Faris, Antonio Federico, Wolfgang Grisold, 2021-10-22 This book is the result of reflections and work of the Specialty group on neurology in migrants of the World Federation of Neurology. The volume provides a synthesis of migrants' health in relation to the sustainable development goals and the 2030 agenda and an up to date overview on neurological diseases among migrants, refugees and ethnic minorities. The book is composed of both general chapters dealing with the history of migration, the relationship between climate change and migration flows, the migration and neurosciences research and the barriers to migrants' health. Other chapters deal with the migrants' particularities of the common neurological diseases such as cerebrovascular diseases, epilepsy, dementia, movement disorders, multiple sclerosis, headache, functional and mental disorders. In addition, also neurological manifestation of COVID-19 in ethnic minorities and palliative care in migrants are discussed. Neurology in Migrants and Refugees will be useful to

neurologists worldwide who can find appropriate knowledge for diagnosis and treatment when facing migrants with neurological disorders which are sometimes difficult to assess in the absence of clinical experience with the migrant population It will also be very useful for international organizations policymakers and non governmental organizations working in the field of health and migration This book will certainly find an indispensable place in neurological departments libraries and will constitute a basic textbook for teaching neurology taking into account ethnicity culture and health inequalities in the care of neurological disorders
