The Art Of Singing:

On the Art of Singing Richard Miller,1996-05-30 Written in a lively non technical style On the Art of Singing is a comprehensive manual that deals with all aspects of singing from the physiology and acoustics of the singing voice to career building

The Art of Singing and Vocal Declamation Charles Santley,2019-08-04 From the INTRODUCTORY For some time regret has been expressed that the Art of Singing is dying out There is no reason why it should but it will die out if the system of teaching at present generally in vogue continues There is only one system by which anything art science or profession can be learned A housemaid can never become expert if she does not first learn to handle broom brush and duster carpets will be worn to shreds furniture scratched ornaments defaced long before they ought to show the least sign of wear and tear If such be the effect of imperfect education in the ordinary profession of keeping a house clean and orderly what must be the necessity for acquiring first principles in order to attain perfection in the exercise of one if not the most difficult of all arts In the course of the remarks I intend to make I wish it to be distinctly understood that I make them as adviser not as dictator They will be opinions formed on theoretical and practical experience extending over upwards of sixty years As I have always minutely studied the results of the work of those artistes with whom I have been associated as well as of my own I believe I may justly hope that my remarks will prove useful to those who are desirous of studying singing with the object of adopting the vocal art as a profession It is a mistake to suppose that because in modern compositions for the voice there is an absence or nearly so of fioritura the exercise of scales solfeggi etc is unnecessary as such exercises have other two objects of greater importance than that of acquiring even rapid execution viz of equalising the quality and power of the voice and of preserving it intact until age destroys its charm It is a general idea that florid music was introduced to show off the technical ability of the singer It was not The fioritura is a great assistance to declamation whether in serious or comic buffo music Plain chant is the most ancient vocal music I believe in use at the present day I could quote innumerable examples of it from the Gradual and other music books used in the Roman Church abounding in fioriture They surely could not have been written to show off the technical ability of the monks or priests whose office it was to sing them but by holding the ear in suspense with attractive sound to intensify materially the declamation of the text There must have been a reason for wedding words to music and singing instead of reciting them A sonorous singing voice is more sympathetic than a speaking voice and consequently when well trained makes more and a more lasting impression on the generality of mankind moreover a singing voice properly trained is more distinctly audible in a large space than a speaking voice of equal power
