International Planned Languages Detlev Blanke,2019-01-05 The author of this book the German interlinguist and Esperanto researcher Detlev Blanke 1941 2016 has influenced the study of planned languages like no one else It is to a large extent due to his lifelong scholarly devotion to this area of research that Interlinguistics and Esperanto Studies Esperantology have become serious subjects of study in the academic world In his publications Blanke gives an overview of the history of language creation He describes the most important planned language systems and presents various systems of classification A special focus is put on Esperanto initiated by L L Zamenhof in 1887 Sabine Fiedler For Blanke a planned language was essentially a tool if it worked it was worthy of study and use if it failed to work he was interested in why though at the same time careful to avoid value judgments Blanke himself spoke a planned language namely Esperanto and recognised this language and language projects like it as arising out of a coherent theoretical base and addressing a recognisable problem Essentially independently of the sociolinguistic school in the west Blanke had reached a similar conclusion if a language phenomenon exists it is worthy of scholarly examination in itself Blanke was particularly interested in how planned languages related to ethnic languages how the artificiality of say Esperanto extended to indeed was synonymous with the artfulness of ethnic language and how planned language could solve taxonomic and terminological problems Humphrey Tonkin *A Short History of the International Language Movement* Albert Léon Guérard,1922

**Scientific Babel** Michael D. Gordin,2015-04-13 English is the language of science today No matter which languages you know if you want your work seen studied and cited you need to publish in English But that hasn't always been the case Though there was a time when Latin dominated the field for centuries science has been a polyglot enterprise conducted in a number of languages whose importance waxed and waned over time until the rise of English in the twentieth century So how did we get from there to here How did French German Latin Russian and even Esperanto give way to English And what can we reconstruct of the experience of doing science in the polyglot past With Scientific Babel Michael D Gordin resurrects that lost world in part through an ingenious mechanism the pages of his highly readable narrative account team with footnotes

not offering background information but presenting quoted material in its original language The result is stunning as we read about the rise and fall of languages driven by politics war economics and institutions we actually see it happen in the ever changing web of multilingual examples The history of science and of English as its dominant language comes to life and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices but also of the possibilities of the polyglot and the losses that the dominance of English entails Few historians of science write as well as Gordin and Scientific Babel reveals his incredible command of the literature language and intellectual essence of science past and present No reader who takes this linguistic journey with him will be disappointed
