The History Teacher, 1976 *American Airpower Strategy in Korea, 1950-1953* Conrad C. Crane, 2000

The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war The book considers not only the actual air effort in Korea but also its ramifications The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam As America observes the fiftieth anniversary of its initial engagement in Korea Crane's book is an important reminder of the lessons learned there And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force's capabilities and limitations

To Avoid Catastrophe Michael Pollock Hamilton, 1977

At 5:30 in the morning of July 16, 1945 the era of nuclear destruction dawned The blast of the bomb broke a window 125 miles away turned the desert sand to glass at the point of explosion and formed a crater 1,200 feet in diameter During the first week of July 1977 Americans learned of the detonation of a new weapon a neutron bomb which destroys human lives by enormous doses of

radiation yet is harmless to buildings Obviously civilization is in a precarious condition How have we allowed ourselves to reach this state Where will our preoccupation with nuclear weapons lead us The authors of these ten essays all of them internationally recognized spokesman on nuclear power attempt to answer these questions from their comprehensive knowledge of the issues The past is evaluated the future speculated This is not a doomsday book rather it is a careful study of the situation of the origins of nuclear policies of present positions and of the possibility even high probability of disasters in the future not only in global warfare but in accidents and isolated acts of sabotage and terrorism Something must be done to avoid catastrophe and the authors of this volume in offering various recommendations seek to educate their readers and encourage them to become involved in constructive policy making Publisher **Encyclopedia of Curriculum Studies**
