The Psychology of the Foreign Exchange Market Thomas Oberlechner, 2005-07-08 This book demystifies the foreign exchange market by focusing on the people who comprise it. Uncertainty and Expectation Gerald Ashley, 2005-08-05 In this entertaining and thoughtful book Gerald Ashley sets out to explain what trading is and lays out a modus operandi for being a trader and investor. He draws upon market anecdotes and examples from the past seeking to debunk many myths surrounding financial markets and to try and make the reader understand the real processes risks and rewards that drive investment. In particular he examines ideas in market and individual investor behaviour and questions the usefulness of many of today's standard investment techniques including benchmarks charts, analysts and gurus. He also lays out simple precepts for understanding investment risk and suggests ideas for managing your investments in today's markets.

Fibonacci and Gann Applications in Financial Markets George MacLean, 2005-08-19 There are many books covering Fibonacci from an artistic and historical point of view and almost as many suggesting that Fibonacci retracements and numbers can be successfully applied to financial market time series. What is missing is a book that addresses the common errors in using screen based Fibonacci and Gann and other tools. The book is a critical exploration of Fibonacci numbers, retracements, projections, timeframes and fanlines and their current usage within the financial markets by technical analysts. Although they can be extremely effective analytical tools when used appropriately, mistakes in usage can be extremely costly from a financial and credibility viewpoint. George MacLean takes a brief look at the history of Fibonacci and Gann before providing a full account of their applications in financial markets including fixed income, equity, foreign exchange, commodities and indexes. In particular he draws attention to the overuse and misuse of easily applied computer packages available to professional and amateur traders.
