Paul Thomas Welty

The Asians:

Military Thought of Asia Kaushik Roy, 2020-11-04 *Military Thought of Asia* challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present. The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia. The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions. The book considers the systematic and tight representation of ideas by famous figures including Kautilya and Sun Tzu. At the same time it also highlights publications on military affairs by small men like mid-ranking officers and scattered ideas regarding the origin, nature and societal impact of organised violence present in miscellaneous sources like coins, inscriptions, paintings and fictional literature. In so doing, the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of cameo and historicises the evolution of theory and the praxis of warfare. The volume shows that the East has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age. It is essential reading for those interested in the evolution of military thought throughout history, particularly in Asia. **Asian American X** Arar Han, John Y. Hoffman, 2017-01-24 The startling economic and political answers behind Europe's historical dominance. Between 1492 and 1914 Europeans conquered 84 percent of the globe. But why did Europe establish global dominance when for centuries the Chinese, Japanese, Ottomans and South Asians were far more advanced? In *Why Did Europe Conquer the World?* Philip Hoffman demonstrates that conventional explanations such as geography, epidemic disease and the Industrial Revolution fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political and historical changes that set European states on a distinctive path of development: military rivalry and war. This resulted in astonishingly rapid growth in Europe's military sector and produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade and even which economies were the first to industrialize. **Debunking traditional arguments: Why Did Europe Conquer the World?** reveals the startling reasons behind Europe's historic global supremacy. **The Asians** Paul Thomas Welty, 1976 *Asian Children in American Classrooms*, 1977 **The Complete Works** John Bunyan, 1877 *Graduate and Faculty Studies* Centro Escolar University, 1964 *America in the East* William Elliot Griffis, 1899 **Nyasaland** Great Britain.
