## **The Ignorance:**

Ignorance and Imagination Daniel Stoljar, 2006-05-25 It is an article of faith in contemporary analytic philosophy that the problem of consciousness is conceptual in origin that is that it arises because of unclarity in the concept of consciousness or related concepts and such a solution to the problem would involve a clarification of the relevant concepts Ignorance and Imagination argues that solutions of this kind are misguided because they all stem from a mistake view of the problem In particular the problem itself is not conceptual in origin but is epistemic that is it arises from our ignorance of some of the physical facts Stoljar argues once one has a clear view of the nature of the problem a solution to it is relatively easy to provide

**The Matter of Consciousness** Torin Andrew Alter, 2023 Torin Alter makes a compelling case against the view that consciousness is a physical phenomenon He argues that Frank Jackson's knowledge argument refutes all standard versions of physicalism and leads to Russellian monism the view there are intrinsic properties which both constitute consciousness and underlie properties described by physics

nature of Christ and the role of the Sacraments in effecting a bridge between God and man Within these broad topical boundaries though Aquinas examines the nature of God and man in exquisite detail His examination includes questions of how angels act on bodies the union of body and soul the cause and remedies of anger cursing and the comparison of one sin with another Aquinas is attempting to offer a truly universal and rational view of all existence Thomas Aquinas O P 1225 1274 also Thomas of Aquin or Aquino was an Italian Dominican priest and an immensely influential philosopher and theologian in the tradition of scholasticism within which he is also known as the Doctor Angelicus Doctor Communis and Doctor Universalis He was the foremost classical proponent of natural theology and the father of Thomism His influence on Western thought is considerable and much of modern philosophy was conceived in development or refutation of his ideas particularly in the areas of ethics natural law metaphysics and political theory
