The Imitation Game Jane Rollason, 2015 Based on the award winning 2014 film *The Imitation Game* tells the true story of cryptanalyst Alan Turing and his brilliant team of code breakers as they crack the famous Enigma Code during World War II

Alan Turing, het Enigma Andrew Hodges, 2015-10-27 Er is niet veel overdreven aan de stelling dat de Britse wiskundige Alan Turing de geallieerden heeft gered in hun strijd tegen de Nazis dat hij de uitvinder was van de computer, de bedenker van kunstmatige intelligentie en een voorloper in de strijd om vrijheid voor homoseksuelen en dat alles voordat hij 41 jaar oud zelfmoord pleegde. Deze schitterende biografie vertelt het definitieve verhaal van een uitzonderlijk genie en een even uitzonderlijk leven. Alan Turings grote kracht was zijn brillante analytische geest gecombineerd met zijn gave voor het ontwerpen van intelligente machines. In 1940 wist hij met zijn vindingen de Duitse Enigma code te kraken, de code waarmee de Duitse lucht en zeemacht alle communicatie beveiligde. Hij bracht er het Duitse oorlogscommando een slag mee toe die de oorlog bekortte en vele mensenlevens redde. Het was niet Turings enige wapenfeit. Al voor de oorlog werkte de brillante wiskundige aan het concept van een universele machine, een idee dat hij in 1945 uitwerkte tot de allereerste digitale computer. In 1952 kwam een abrupt einde aan de glansrijke carrière van Alan Turing toen hij door de autoriteiten werd opgepakt wegens homoseksualiteit, een strafbaar feit dat in die tijd nog actief werd vervolgd. In het land dat hij zes jaar lang in het belang van de vrijheid had gediend, volgde een veroordeling en een mensonterende behandeling. In 1954 pleegde Alan Turing 41 jaar oud zelfmoord. Alan Turing het Enigmaverscheen voor het eerst in 1983 en kreeg een glorieuze ontvangst. Enkele jaren geleden volgde een herziene editie ingeleid door Douglas Hofstadter.

The Imitation Game Adonis Grey, 2020-10-31. In 1951 two policemen Nock and Staehl investigate the mathematician Alan Turing after an apparent break in at his home. During his interrogation by Nock Turing tells of his time working at Bletchley Park. In 1927 the young Turing is unhappy and bullied at boarding school. He develops a friendship with Christopher Morcom who sparks his interest in cryptography and develops romantic feelings for him. Before Turing can confess his love Christopher dies unexpectedly from tuberculosis. When Britain declares war on Germany in 1939 Turing travels to Bletchley Park where under the direction of Commander Alastair Denniston he joins the cryptography team of Hugh Alexander, John Cairncross, Peter Hilton, Keith Furman and Charles Richards. The team are trying to decrypt the Enigma machine which the Nazis use to send coded messages. Turing is difficult to work with and considers his colleagues inferior. He works alone to design a machine to decipher Enigma. After Denniston refuses to fund construction of the machine Turing writes to Prime Minister Winston

Churchill who puts him in charge of the team and funds the machine Turing fires Furman and Richards and places a difficult crossword in newspapers to find replacements Joan Clarke a Cambridge graduate surpasses Turing's test but her parents will not allow her to work with the male cryptographers Turing arranges for her to live and work with the female clerks who intercept the messages and shares his plans with her Turing's machine which he names Christopher is constructed but cannot determine the Enigma settings before the Germans reset the Enigma encryption each day Denniston orders it destroyed and Turing fired but the other cryptographers threaten to leave if he goes After Clarke plans to leave on the wishes of her parents Turing proposes marriage which she accepts During their reception Turing confirms his homosexuality to Cairncross who warns him to keep it secret After overhearing a conversation with a clerk about messages she receives Turing has an epiphany realising he can program the machine to decode words he already knows exist in certain messages After he recalibrates the machine it quickly decodes a message and the cryptographers celebrate however Turing realises they cannot act on every decoded message or the Germans will realise Enigma has been broken Turing discovers that Cairncross is a Soviet spy When Turing confronts him Cairncross argues that the Soviets are allies working for the same goals and threatens to disclose Turing's homosexuality if his role as an agent is revealed When the MI6 agent Stewart Menzies appears to threaten Clarke Turing reveals that Cairncross is a spy Menzies reveals that he knew this already and planted Cairncross among them in order to leak messages to the Soviets for British benefit Fearing for her safety Turing tells Clarke to leave Bletchley Park revealing that he is gay and lying about never having cared for her After the war Menzies tells the cryptographers to destroy their work and that they can never see one another again or share what they have done In the 1950s Turing is convicted of indecency and in lieu of a jail sentence undergoes chemical castration so he can continue his work Clarke visits him in his home and witnesses his physical and mental deterioration She reminds him that his work saved lives and uses the phrase Christopher used of Turing and Turing once used of her Sometimes it is the people no one imagines anything of who do the things that no one can imagine

The Third Wave in Science and

Technology Studies David S. Caudill, Shannon N. Conley, Michael E. Gorman, Martin Weinel, 2019-05-14 This book analyzes future directions in the study of expertise and experience with the aim of engendering more critical discourse on the general discipline of science and technology studies. In 2002 Collins and Evans published an article entitled *The Third Wave of Science Studies* suggesting that the future of science and technology studies would be to engage in *Studies in Expertise and Experience*. In their view scientific expertise in legal and policy settings should reflect a consensus of formally trained scientists and citizens with experience in the relevant field but not ordinary citizens. *The Third Wave* has garnered attention in journals and in international workshops where scholars delivered papers explicating the theoretical foundations and practical applications of the *Third Wave*. This book arose out of those workshops and is the next step in the popularization of the *Third Wave*. The chapters address the novel concept of interactional experts, the use of imitation games appropriating scientific expertise in law and policy settings and recent theoretical developments in the *Third Wave*. **The Imitation Game** Lewis Archer, Mike O'Neill, 2015
