The Deconstruction Of Time

Marcel A. Müller

The Deconstruction Of Time:

The Deconstruction of Time David Wood, 2001 Double rethinking seeks to rethink time in terms of our experience of it and attempts to rethink our selves in terms of the results of that initial rethinking This book undertakes a critical reformulation of the project through discussions of Derrida Nietzsche Husserl and Heidegger *The Deconstruction of Time* David Wood, 1989-06 The Deconstruction of Time is the first book to examine what has become the fundamental even defining project in Continental philosophy double rethinking Begun by Edmund Husserl this area of inquiry in part seeks to rethink time in terms of our experience of it a second aspect begun by Martin Heidegger is an attempt to rethink ourselves and philosophy itself in terms of the results of that initial rethinking *The Deconstruction of Time* David Wood, 1989

The Deconstruction of Time David Charles Wood, 1985 **Time in Archaeology** Simon Holdaway, LuAnn Wandsnider, 2008-09-26 A tightly focused group of papers on the deconstruction and significance of the concept of time with a historical background on the development of time perspectivism and a range of case studies and examples After reading this you may never think about time in quite the same way *Re-Thinking International Relations Theory via Deconstruction* Badredine Arfi, 2013-03-01 International Relations IR theorists have ceaselessly sought to understand explain and transform the experienced reality of international politics Running through all these attempts is a persistent yet unquestioned quest by theorists to develop strategies to eliminate or reduce the antinomies contradictions paradoxes dilemmas and inconsistencies dogging their approaches A serious critical assessment of the logic behind these strategies is however lacking This new work addresses this issue by seeking to reformulate IR theory in an original way Arfi begins by providing a thorough critique of leading contemporary IR theories including pragmatism critical scientific realism rationalism neo liberal institutionalism and social constructivism and then moves on to strengthen and go beyond the valuable contributions of each approach by employing the logic of deconstruction pioneered by Derrida to explicate the consequences of taking into account the dilemmas and inconsistencies of these theories The book demonstrates that the logic of deconstruction is resourceful and rigorous in its questioning of the presuppositions of prevailing IR approaches and argues that relying on deconstruction leads to richer and more powerfully insightful pluralist IR theories and is an invaluable resource for taking IR theory beyond currently paralyzing wars of paradigms Questioning universally accepted presuppositions in existing theories this book provides an innovative and exciting contribution to the field and will be of great interest to scholars of international relations theory critical theory and international relations *Back to the Future of the Body* Dominic Janes, 2013-02-14 What can the past tell us about the future s of the body The origins of this collection of papers lie in the work of the Birkbeck Institute for the Humanities which has been involved in presenting a series of international workshops and conferences on the theme of the cultural life of the body The rationale for these events was that in concepts as diverse as the cyborg the questioning of mind body dualism the contemporary image of the suicide bomber and the patenting of human genes we can identify ways in

which the future of the human body is at stake This volume represents an attempt not so much to speculate about what might happen but to develop strategies for bodily empowerment so as to get back to the future of the body The body it is contended is not to be thought of as an object or a sign but as an active participant in the shaping of cultural formations And this is emphatically not an exercise in digging corpses out of the historical archive The question is rather what can past lived and thought experiences of the body tell us about what the body can become The continuing vitality of debate around the body was proven by the range and depth of the papers presented at the workshop on which this volume is based does the body have a future Our overall theme required contributors to think through embodiment in the past This they did with considerable interdisciplinary vigour rigorousness and imagination Prof Donna Dickenson Director Birkbeck Institute of the Humanities

The Moment Thomas Wägenbaur, 1993 Written representations of momentary phenomena such as the Fall the kairos epiphany the nunc stans the sublime dialectical and historical moments of change and moments of deferral are always doomed to fail However representational failures at writing have always been turned into a performative success more writing The author's reading of the various textualizations of the moment is not historical but genealogical Foucault and not typological but economical Derrida it reveals the moment as an inevitable trope the deconstruction of a representational moment in a given text reinscribes this moment as the text's performative momentum This ever shifting meaning of the moment has been followed through literary and philosophical texts from Plato to Beckett

The Deconstruction of Time and the Displacement of Desire, 1978 *Proceedings of the International Conference on Smart and Sustainable Built Environment (SASBE 2024)* Ali GhaffarianHoseini, Amirhosein Ghaffarianhoseini, Farzad Rahimian, Mahesh Babu Purushothaman, 2025-04-19 This book presents peer reviewed articles from the International Conference of Sustainable Development and Smart Built Environments SDSBE2024 held from 6-8 Nov at Auckland New Zealand It encapsulates cutting edge research in Sustainable Development and Smart Built Environments featuring global scholars Encompassing diverse themes the book explores sustainable urban development governance and policy emphasizing urban greening and climate resilience It delves into innovative approaches for sustainable transport intelligent infrastructure and community well being The integration of Data Science AI and IoT for optimizing built environments is a focal point alongside advancements in digital twins and OpenBIM Social aspects including equity and indigenous perspectives are explored along with health considerations in urban settings The proceedings serve as a comprehensive resource reflecting the multifaceted advancements driving sustainable and smart urban futures

Law's Trace: From Hegel to Derrida Catherine Kellogg, 2009-12-04 Law's Trace argues for the political importance of deconstruction by taking Derrida's reading of Hegel as its point of departure While it is well established that seemingly neutral and inclusive legal and political categories and representations are always in fact partial and exclusive among Derrida's most potent arguments was that the exclusions at work in every representation are not accidental but constitutive Indeed one of the most significant ways that

modern philosophy appears to having completed its task of accounting for everything is by claiming that its foundational concepts representation democracy justice and so on are what will have always been They display what Derrida has called a fabulous retroactivity This means that such forms of political life as liberal constitutional democracy capitalism the rule of law or even the private nuclear family appear to be the inevitable consequence of human development Hegel s thought is central to the argument of this book for this reason the logic of this fabulous retroactivity was articulated most decisively for the modern era by the powerful idea of the *Aufhebung* the temporal structure of the always already Deconstruction reveals the exclusions at work in the foundational political concepts of modernity by re tracing the path of their creation revealing the always already at work in that path Every representation knowledge or law is more uncertain than it seems and the central argument of *Law s Trace* is that they are therefore always potential sites for political struggle

Time and Relative Dissertations in Space David Butler,2007 With essays addressing core themes such as genre narrative authorship visual style music sound audiences adaptations and the portrayal of history on screen *Time And Relative Dissertations In Space* will be of interest to those involved in the wider field of Television Studies as well as readers with a fascination and love for Doctor Who

In Search of Radical Theology John D. Caputo,2020-10-06 These sparkling essays from a seasoned scholar are a great breath of fresh air in our claustrophobic and catastrophic time Cornel West Capturing a career s worth of thought and erudition this rich volume treats readers to creative thought careful argumentation and sophisticated analysis transmitted through the lucid accessible prose that has earned the author a wide readership of academics and non academics alike In tackling radical theology John D Caputo has in mind the deeper stream that courses its way through various historical and confessional theologies upon which these theologies draw even while it disturbs them from within They are well served by this disturbance because it keeps them on their toes When we read about professional theologians losing their jobs in confessional institutions the chances are that by earnestly digging into what is going on in their tradition they have hit upon radical theological rock Unlike modernist dismissals of religion radical theology does not debunk but re invents the theological tradition Radical theology Caputo says is a double deconstruction of supernatural theology on the one hand and of transcendental reason on the other and therefore of the settled distinctions between the religious and the secular Caputo also addresses the challenge for radical theology to earn a spot in the curriculum given that the radical makes it suspect among the confessional seminaries while the theology renders it suspect among university seminars Journeying from the academy to contemporary American culture *In Search of Radical Theology* includes a captivating presentation of radical political theology for the time of Trump This utterly unique volume not only brings readers on an enlightening tour of Caputo s thought but also invites us to accompany the author as he

travels into intriguing new territories **In Business** ,2005 *The New Yearbook for Phenomenology and Phenomenological Philosophy* Steven Galt Crowell,Burt C.
