*The authors of this book are providing this digital version free -
may not be redistributed, nor may any copies, in any form, be
resale purposes.*

The digital version has been created by the efforts of a number of Ph.D. students in the Information Systems Department at the New Jersey Institute of Technology. There are in fact a number of thesis efforts that have been undertaken to utilize the concepts of the Delphi Method to design and evaluate groups communication systems for large groups dealing with complex problems.

If you find the material in this reproduction of the original 1975 book to be useful, we would like to suggest you make a modest contribution to the IS graduate student fund at NJIT.

Dajani, Leonard Ortolano, 1979 *Forecasting with Judgment* George Wright, Paul Goodwin, 1998-04-22 All forecasting involves human judgment and many forecasts are based exclusively on judgment. This book brings together the latest research into the role of judgment in forecasting. It considers questions such as: How good is human judgment? Do judgmental forecasters use information efficiently? What techniques are available to help groups of people to produce better forecasts? What reasoning processes are employed by people when they make judgments about uncertainty? When should judgment be used in combination with statistical methods? The role of judgment in strategic planning, financial forecasting and sales forecasting is considered from both theoretical and practical perspectives. It will be of interest both to professional forecasters and academics and should stimulate further research into the processes involved in making judgmental forecasts and how these processes can be improved. **Management Alternatives for Natural Resources** David M.
