The Descriptive Analysis Of Power:

The Descriptive Analysis of Power Jack H. Nagel, 1975

The Descriptive Analysis of Power Jack H. Nagel,

Democracy and Difference Seyla Benhabib, 1996-07-28

The global trend toward democratization of the last two decades has been accompanied by the resurgence of various politics of identity difference. From nationalist and ethnic revivals in the countries of east and central Europe to the former Soviet Union to the politics of cultural separatism in Canada and to social movement politics in liberal western democracies the negotiation of identity difference has become a challenge to democracies everywhere. This volume brings together a group of distinguished thinkers who rearticulate and reconsider the foundations of democratic theory and practice in the light of the politics of identity difference. In Part One Jürgen Habermas, Sheldon S. Wolin, Jane Mansbridge, Seyla Benhabib, Joshua Cohen and Iris Marion Young write on democratic theory. Part Two on equality, difference and public representation contains essays by Anne Phillips, Will Kymlicka, Carol C. Gould, Jean L. Cohen and Nancy Fraser and Part Three on culture, identity and democracy by Chantal Mouffe, Bonnie Honig, Fred Dallmayr, Joan B. Landes and Carlos A. Forment. In the last section Richard Rorty, Robert A. Dahl, Amy Gutmann and Benjamin R. Barber write on whether democracy needs philosophical foundations.

Interactions Between China's National Emissions Trading Scheme and Electricity Market: Practices and Policies Tsun Se Cheong, Xunpeng (Roc) Shi, Yongping Sun, Jian Yu, Xin Yao, 2023-11-03 China's national carbon market the world's largest emissions trading scheme ETS kicked off its first online trade recently This can be called a milestone for the country towards the nation's goals of having CO₂ emissions peak before 2030 and achieving carbon neutrality by 2060 China's national ETS initially covers the power sector before being expanded to a much broader set of energy intensive industries On one hand the electricity sector the largest carbon emitting industry is responsible for about 40% of China's emissions and it has great significance to response to global climate change On the

other hand the effectiveness of China's ETS will rest on how well it is coordinated with power market regulations and policies. In this regard the deepening of reform as well as the advanced technology and its applications in the electricity market will add new challenges and opportunities to electricity trade which in turn influences national ETS. Therefore this brings urgency to accurately capture the dynamic interactions between national ETS and electricity market to transform carbon trading into a practical and effective way to decarbonize the power sector.
