The Black Bridge:

The Black Bridge Charlotte Foster,2001-05 The Black Bridge is a story of two widows one self made and her friend who becomes an unwilling investigator Vivian Schwartzer has made great sacrifices so that her husband can run for governor of South Dakota When he loses the nomination they argue violently and she pushes him off an abandoned railroad bridge into the frozen Missouri river forty feet below Her friend Elinore Blair is sent out to investigate Max s death Elinore is a widow and comforts Vivian while she tries to discover what happened to Max As Elinore becomes a threat to Vivian Vivian reacts to the threat The situation is complicated by the proposed closing of the local college and the problems of Elinore s two children The Black Bridge is about the strength and power of women and their terrible loneliness when they lose the men they love It is about powerlessness in politics It raises the question of justice and the price of that justice The Black Bridge also portrays the instant connection that occasionally occurs between a man and a woman a connection without rhyme or reason without plan but always with consequences

Don't Burn it Here Edward J. Walsh,Rex Warland,2010-11-01 When first proposed

in this country during the 1970s waste to energy WTE incinerators appeared to be ideal solutions to the growing mounds of trash in our throw away society Promising to convert useless garbage into electricity while saving precious landfill space trash incinerators seemed perfectly timed to respond to a national need Within a decade however a grassroots anti incineration movement emerged as a vibrant offshoot of the environmental movement In Don t Burn It Here sociologists Edward Walsh Rex Warland and D Clayton Smith examine this grassroots movement through detailed analyses of the struggles surrounding proposals to build eight municipal incinerators in Pennsylvania New York and New Jersey The eight case histories that form the heart of the book are comparable to hundreds of others across the U S The authors research is based on interviews focus group discussions extensive newspaper files and questionnaire responses from participants on both sides of the conflicts A final chapter examines the similarities and differences between the three successful projects and the five defeated ones An overview of the history of the modern incinerator in the U S and the emergence of a major national opposition movement provides the necessary context and throughout the book the authors make useful comparisons to other national movements seeking legal justice for deprived collectivities such as women and ethnic groups This project was supported by a grant from the Ford Foundation s Fund for Research in Dispute Resolution Striving to maintain a balanced treatment of both sides of the incinerator battles the authors provide fresh theoretical and methodological perspectives on a new type of collective action They also help to close the gap between theory and empirical data in the social sciences

Secrets of the Grand Canyon Lanny Kuester,2010-12-21 The next step in the journey brought us to a sturdy Park Service bus waiting nearby According to guidebooks this bus would carry us to the top of the South Kaibab Trail Amy and I climbed up the steps and down the narrow aisle lugging our backpacks loaded with sleeping mats clothes and food The water

a gallon for each of us gurgled reassuringly in plastic bottles We sat down near the back of the bus After waiting for late arrivals the bus driver closed the squeaky door started the bus glanced at the rear view mirror and shifted the gears The driver a frumpy middle aged woman with hints of gray in her hair started her route with a slight lurch of the bus Even at this early hour several people got on and off at various trailheads and scenic overlooks that lined the rim of the Canyon The driver seemed relaxed and friendly I felt a mixture of rising anticipation and panic sweep over me as we moved from the known into the unknown One part of me felt giddy with exhilaration as we neared the trailhead Another cautious part inside wanted answers and a reassurance I could not supply This voice began with the usual question Now what did we forget to pack Other questions nagged at me beneath the surface What am I doing Am I getting in way over my head I felt embarrassed and reluctant to share my reservations with Amy at this early stage of our journey Amy silently gazed out the window as the bus bumped along Several other people on board spoke quietly but with eager nervous voices One younger couple sat quietly staring out at the passing trees clear sky and a few scattered park buildings Time seemed to shift during that ride to the top of the South Kaibab trail Even through the windows the views from the top of the Canyon were magical The elevation on the South Rim of the Canyon reached over 7 000 feet At certain points we saw visitors walking along the edge to admire the scenery I had visited the Canyon just once during a winter vacation to Arizona with my ex wife just a few years before Unfortunately the trail was icy at the time and we cautiously hiked down only a short distance before turning back Like most awestruck tourist I spent the previous visit walking along the rim snapping too many pictures and admiring the views from the top of the Canyon As we gazed out the window of the bus I could catch glimpses of the same views that enchanted me years before I recalled that at certain points along the rim you could catch a glimpse of the Colorado River almost a mile below although the folds and contours of the Canyon walls usually hide it During the ride all of our plans for hiking down into the Canyon took on a new reality I finally realized in the pit of my stomach that we were really going on this trek and that we were going to be descending an entire mile in elevation carrying a heavy backpack every step of the way To calm my inner turmoil I reviewed once again why we had chosen the South Kaibab Trail to reach the Colorado River For one thing it offered a rich history The South Kaibab consisted of a six mile hike down a steep track first used by natives who legend has it followed a game path into the Canyon Later in the nineteenth century miners searching for gold and silver widened and developed the trail By the beginning of the twentieth century most of the mines proved unprofitable and the miners abandoned them However the trails the miners developed became popular with the growing number of tourists drawn to the Canyon During the 1930s the park service started improving and maintaining a number of these trails into the Canyon including the South Kaibab Trail The South Kaibab quickly gained a reputation for its beauty Many hikers selected this route because unlike other popular routes it often followed ridgelines and offered a number of unobstructed views of the Canyon However the tra
