*An Introduction to Bilingualism* Jeanette Altarriba, Roberto R. Heredia, 2011-02-11 This important text provides a general overview of the methods and theories used in the broad domain of bilingualism. The unique interdisciplinary approach which is reflected in the various topics covered gives students a global picture of the field. Topics range from early childhood intellectual development to educational and social cognitive challenges to the maturing bilingual brain. Important developing areas such as cognitive aging, creativity, the social and cultural context, perspective, communication disorders and sentence processing are also covered within the volume. This text is aimed towards undergraduate courses and graduate courses in psycholinguistics, especially those with an emphasis on bilingualism or second language learning.

Crosslinguistic Influence and Crosslinguistic Interaction in Multilingual Language Learning Gessica De Angelis, Ulrike Jessner, Marijana Kresic, 2015-11-05 Which strategies do multilingual learners use when confronted with languages they don't yet know? Which factors are involved in activating prior linguistic knowledge in multilingual learning? This volume offers valuable insights into recent research in multilingualism, crosslinguistic influence and crosslinguistic interaction. Experts in the field examine the role of background languages in multilingual learning. All the chapters point to the heart of the question of what the multilingual mind is. Does learning one language actually help you learn another and if so why? This volume looks at languages and scenarios beyond English as a second language. Italian, Gaelic, Dutch and German amongst others are covered as well as instances of third and additional language learning. Research into crosslinguistic influence and crosslinguistic interaction essentially contributes to our understanding of how language learning works when there are three or more languages in contact.
