**Spectral Decompositions and Analytic Sheaves** Jörg Eschmeier, Mihai Putinar, 1996 Rapid developments in multivariable spectral theory have led to important and fascinating results which also have applications in other mathematical disciplines In this book classical results from the cohomology theory of Banach algebras multidimensional spectral theory and complex analytic geometry have been freshly interpreted using the language of homological algebra It has also been used to give insights into new developments in the spectral theory of linear operators Various concepts from function theory and complex analytic geometry are drawn together and used to give a new approach to concrete spectral computations The advantages of this approach are illustrated by a variety of examples unexpected applications and conceptually new ideas which should stimulate further research      **Analytically Invariant Spaces in Spectral Decompositions of Linear Operators in Banach Spaces** Ridgley E.
