Spectral Evolution Of Galaxies:

Spectral Evolution of Galaxies C. Chiosi, Alvio Renzini, 2012-12-06 As it was said by one of the participants to this workshop In our attempts to understand the spectral evolution of galaxies we are fortunate indeed to have the ability to look back in time and observe galaxies as they were billions of years ago Perhaps in no other discipline is it possible to gain such a direct view to history The galaxies we seek to study are remote their light faint and thus only recently has it become technically feasible to sample the spectra of normal luminosity galaxies at lookback times of five billion years or more or perhaps even to see galaxies in the process of their formation or shortly afterwards This fourth workshop organized by the Advanced School of Astronomy was indeed centered on the Spectral Evolution of Galaxies on reviewing and discussing the relevant astrophysical processes and on assessing our current ability to model and understand the evolution of stellar populations Following an opening session dealing with some outstanding questions of galaxy evolution Session I addressed the specific problems of galaxy and star formation processes topics of uncertainty and controversy to which IRAS observations may give novel perspectives The properties of stellar populations in the local group of galaxies formed the basis of Session II Session III dealt with the fundamentals of the theory of spectral and photometrical evolution of stellar populations and with recent developments in the theory of stellar structure a necessary step to model and understand galactic evolution

Corwin, Lucette Bottinelli, 1989 From 12 April to 14 April 1988 120 of Gerard and Antoinette de Vaucouleurs's friends and colleagues gathered at the Institut d'Astrophysique in Paris to celebrate Gerard's 70th birthday and his remarkable career in Astronomy The gathering also honored the memory of Antoinette who died 29 August 1987 after a long illness and her own no less remarkable career This volume collects the 24 invited review papers and the 60 contributed poster papers presented at the meeting Gerard de Vaucouleurs Gerard de Vaucouleurs was born on 25 April 1918 in Paris where he spent his boyhood He became an active amateur astronomer in the early 1930s making extensive observations of Mars Jupiter and variable stars including the bright supernova of 1937 in IC 4182 He also began life long interests in astronomical photography and galaxy cataloguing during this period In 1939 he met the director of the Paris transport system and an equally avid amateur

astronomer Julien Peridier De Vaucouleurs worked at Peridier's private observatory at Le Houga in southwestern France on and off throughout the next decade. His undergraduate work was in mathematics, astronomy, and experimental physics; this combined with his interest in observational astronomy formed his life-long empirical approach to science. After spending 18 months in the French army early in 1939-41, Gerard returned to the Peridier observatory and then in 1943 to his studies at the Sorbonne where he met Antoinette.

Enrique Martínez-González, Jose L. Sanz, 1996-06-18. Cosmology has dramatically evolved during the last decade and there has been vast development of e.g. theories of galaxy formation in connection with the early universe or gravitational lensing. These new developments motivated the editors to organize a school covering all of these ideas and observations in a pedagogical way. The topics covered in the 26 lectures of this summer school include QSO absorption systems, identification of objects at high redshift, radiogalaxies, galaxy formation and evolution, galaxy number counts, clustering theories of structure formation, large scale structure and streaming motions, gravitational lensing and spectrum and anisotropies of the cosmic microwave background radiation. Observational developments, data analysis and theoretical aspects are equally treated.
