on Boredom and Modernity Barbara Dalle Pezze,Carlo Salzani,2009 The past thirty years saw a growing academic interest in the phenomenon of boredom If initially the analyses were mostly a historical now the historicity of boredom is widely recognised though often it is taken as evidence of its permanence as a constant quality of the human condition expression of a metaphysical malady inherent to the fact of being human New trends in the literature focus on the peculiar relationship between boredom and modernity and attempt to embrace the new social cultural and political factors which provoked the epochal change of modernity and relate them to a change in the parameters of human experience and the crisis of subjectivity The very changes that characterise modernity are the same that led to the democratisation of boredom modernity and boredom are shown to be inextricably connected and inseparable This volume aims at contributing to the growing body of literature on boredom with a number of essays which reflect on the connection of boredom and modernity and focus on particular texts authors or aspects of the phenomenon The approach is multidisciplinary in keeping with the pervasiveness of the phenomenon in our culture and societies with essays reflecting on philosophy literature film media and psychology

Boredom: The Elephant in the Room Doris Sommer,Robert D. Austin,Alexandra Vuyk,David M. Ndeti,Nicolas Prevelakis,Pier Luigi Sacco,Josefa Ros Velasco,2024-07-16 When cases of domestic violence spiked during the COVID 19 lockdowns terror spread among potential victims while governments that enforced the isolation seemed helpless to address the damages Vulnerable partners children and parents were hostage to possible perpetrators given the risks of retaliation at

home and the danger of death by contamination in shelters The alarm raises questions about under examined triggers for violence against others and oneself One common trigger is boredom It is the elephant in the room a known stressor in institutional settings schools prisons and military installations and otherwise out of focus despite the ubiquity of gender based violence Detecting the ravages of boredom in apparently safe domestic settings hints at a range of meanings for the word and a web of personal and collective dysfunctions including anxiety depression feelings of worthlessness and anomie Conventional remedies for these challenges do not address the escalating rates of violence to oneself and to others Their evident ineffectiveness during the crisis laid bare structural flaws in standard human development strategies which span home and school environments the law and approaches to mental health A major flaw has been the narrow perspectives of one or another discipline when the dangers are interrelated and demand multidisciplinary approaches Chronic violence and alarming rates of depression before during and after the pandemic show failures of predictable perspectives and their recommendations even in normal conditions The question of how authorities should react to harm done begs the question of how to prevent harm from happening Prevention rather than punishment for crimes or treatment for pathologies has become a preferred approach for both legal and clinical interventions To stop violence before it erupts requires investigation into its causes because treating the effects of aggression evacuating victims punishing perpetrators counselling patients addresses symptoms rather than diseases Why was the lockdown a time of increased domestic violence What accounts for recent spikes in teen suicides What are the existing and possible tools for measuring boredom Answers from experts stay within foreseeable observations about the loss of jobs the increase of alcoholism social media addiction and psychological stress These familiar answers do not lead beyond the description of pathological patterns But different approaches may follow from attending to the under examined danger of having nothing to do [The Science of Boredom](#) Sandi Mann,2016-03-22 Are we living in an age where we are more boredom prone Or are other people boring us Or could we be that boring person In our current information age we are constantly connected to technology and have so many varied ways to spend our leisure time that we should all surely never know what boredom feels like Yet boredom appears to be on the rise it seems that the more we have to stimulate us the more stimulation we crave In a quest to relieve our boredom we engage in dangerous risk taking from extreme sports to drugs to gambling to anti social behaviour or we overindulge in shopping or eating The Science of Boredom explores the causes and consequences of boredom in the fast paced twenty first century Parents are desperate to keep their children entertained during every waking moment the education system is geared towards interactivity and attention spans are dropping as we use multiple devices at all times But the world of work can be increasingly repetitive and routine and we are losing the ability to tolerate this everyday tedium Using Sandi Mann s own ground breaking research into boredom this book tells the story of how we act react and cope when we are bored and argues that there is a positive side to boredom It can be a catalyst for humour fun reflection creativity and inspiration The radical solution to the boredom problem
