Excerpt from Adventures and Researches Among the Andaman Islanders The Saddle Mountain is situated to the southward of Port Cornwallis at the distance of a few miles It rises to a considerable height and forms the highest point to be seen in the whole group its elevation being about feet On a favourable day when the atmosphere is clear and cloudless it is visible to the practised eye of the mariner at a distance of twenty leagues from the land The middle division known as the Middle Andaman is separated from the northern portion of the island by a narrow strait It is somewhat larger than the latter extending in length to fifty miles and being fifteen miles in width The narrow strait is quite innavigable and on examining it we found that at a distance of six miles from its eastern outlet it became a mere mud marsh at low water At its north western extremity on the other hand it was ascertained that it opened into a fine broad expanse forming an excellent and capacious harbour with secure anchorage for ships at the extremity of which is Interview Island one of the largest detached islets of the whole group About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
