## **The Arms Trade:**

The Arms Trade Treaty: A Commentary Andrew Clapham, Stuart Casey-Maslen, Gilles Giacca, Sarah Parker, 2016-07-28

The United Nations Arms Trade Treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties there exists controversy as to the meaning of certain key provisions Furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function The Arms Trade Treaty A Commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms As states ratify and implement the Treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates It covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors Arms Trade and Europe Paul Cornish, 1995-03-12 Focusing on conventional weapons rather than nuclear biological and chemical ones this book draws attention to important differences within the EU between the trade in finished weapons and the technology used to make them It examines West European efforts since 1945 to manage both sides of conventional defence related trade and the political industrial technological and conceptual obstacles to effective multilateral co ordination and regulation The book argues that in current European and international circumstances recent EU initiatives have limited prospects and may prove to be counterproductive *Law and the Arms Trade* Laurence Lustgarten, 2020-09-03 This ground breaking book offers an extensive legal analysis grounded in public EU and international law of arms trade regulation integrated with insights drawn from international relations The sale of weapons and related technologies is globally one of the most politically controversial and ethically contentious forms of commerce Intimately connected with sustaining repressive governments and violations of international human rights and humanitarian law arms exports are also a central element in the economic and strategic policies of the governments of all large industrial states They have also been the source of abundant corruption and of serious challenges to the norms and effectiveness of constitutional accountability in democratic states On paper the arms trade is heavily regulated national legislation and international treaties are in place which purport to prohibit certain transactions and limit others Yet despite its importance legal and international relations scholarship on the subject has been surprisingly limited This book fills this gap in the literature by examining and comparing the export control regimes of eight leading nations USA Russia the UK France Germany Sweden China and India with chapters contributed by leading experts in the field of law and international relations **The International Arms Trade** Rachel Stohl, Suzette Grillot, 2009-11-09 This

book explores the complexities and realities of the global conventional weapons trade. It traces the history of the arms trade and examines how it has evolved since the end of the Cold War. In particular, the role of the largest arms exporters and importers and the business of selling conventional arms around the world are assessed, and new light is shed on the illicit arms trade and the shadowy dealers who profit from their deadly commerce. The book also looks closely at the devastating effect the business can have on countries, societies, and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities.

**Book Jacket**      *The Arms Trade Treaty (2013)* Stuart Kenneth Casey-Maslen, Gilles Giacca, Tobias Vestner, 2013      *The Arms Trade and International Law* Zerah Yihdego, 2007-11-16

Shortlisted for the 2008 Young Authors Inner Temple Book Prize. There are believed to be about 700 million small arms and light weapons (SALW) in the world, often contributing to highly destabilising security and other concerns in international law. SALW are the primary source of violations and abuses of humanitarian and human rights principles by states, rebels, terrorists, and criminals. Many consider them the real weapons of mass destruction of our time, causing about half a million deaths annually. The unrestricted international transfer of SALW by states, 99 states and 1000 companies involved in manufacturing and supply, is one of the major contributory and aggravating factors of this crisis. Another is the illicit traffic in small arms. This book deals with the proliferation of SALW and their unregulated trade and transfer across borders. It addresses questions of definition, manufacturing, trade, transfer, and issues relating to state responsibility. The primary focus is on conventional small arms, in particular military-style weapons. The book tackles the core and most divisive legal problem of whether or not the laws relating to arms control and relevant norms of international law provide substantive restrictions upon the transfer of small arms by states. The application of the norms of international peace and security, non-intervention, humanitarian and human rights laws, and evolved relevant customary rules of arms control relating to these norms are considered particularly carefully. Questions of application and enforcement of relevant rules and institutional responses to the problem are also examined. The UN began considering an arms trade treaty in 2006; the publication of the book at this critical moment in time will make a positive contribution towards shaping the debate and aims to further enhance understanding in an area where close analysis is required.

**The No-nonsense Guide to the Arms Trade** Gideon Burrows, 2002. The ending of the Cold War was supposed to increase global security and divert expenditure previously earmarked for arms purchases to more constructive ends. Instead, the arms trade has flourished. Not only conventional arms but also police and surveillance equipment have been provided by Western countries seeking to make a profit from conflict in unstable parts of the world. Foreign debt has remained high, development has been held back, and human rights have been systematically abused, all with the connivance of an arms trade prepared to turn a blind eye to the uses to which increasingly sophisticated weaponry is put, so long as hefty profits can be reaped. This disturbing book names the players in the arms trade and charts the impact that it has had on war, human rights, and development. The financial and trade mechanisms that permit

the arms trade to continue are revealed amid sordid tales of bribery and corruption Gideon Burrows concludes his examination by reviewing the ways in which this trade can be controlled or even abolished **No-Nonsense Guide to the Arms Trade** Nicholas Gilby, 2009-09-01 One of the few up to date works on the whole of the arms trade this book puts the global trade in weapons in the context of history and includes recent controversial deals as well as case studies on Saudi Arabia Iraq and Darfur It exposes the cynicism bribery and insider deals that characterize the conventional trade and the hidden world of torture Nicholas Gilby led the Campaign Against Arms Trade CAAT in its efforts to expose the corruption at the heart of Britain's arms deals with Saudi Arabia over the past four decades In 2008 he forced the disclosure of many documents concerning corruption in Britain's arms deals with Saudi Arabia *The Arms Trade* Noël Merino, 2009 The Current Controversies series examines today's most important social and political issues Each volume presents a diverse selection of primary sources representing all sides of the debate in question These are excellent resources for research or debate that will rouse students interested in contemporary and controversial topics Booklist Book jacket *The Arms Trade Treaty* Stuart Casey-Maslen, Andrew Clapham, Gilles Giacca, Sarah Parker (Firearms researcher), 2016 The United Nations Arms Trade Treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by States Parties there exists controversy as to the meaning of certain key provisions Furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function The Arms Trade Treaty A Commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms As states ratify and implement the Treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions This volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the Arms Trade Treaty regulates It covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors Publisher's website
