Speakers Of Quotations:

The Rhetorical Functions of Scriptural Quotations in Romans Katja Kujanpää, 2018-10-02 Quotations from Jewish scriptures play a crucial role in the Letter to the Romans The Rhetorical Functions of Scriptural Quotations in Romans explores their rhetorical functions in Paul's argumentation It offers a careful text critical analysis of the 51 quotations in Romans and asks questions such as does Paul quote accurately according to a wording known to him or does he adapt it himself Moreover to what extent does Paul strive to preserve the sense that the quoted words have in their original context Katja Kujanpää's approach of combining rhetorical matters with close textual study results in a more comprehensive picture of quotations in Romans than has been previously seen Thus the book opens new perspectives on Paul's argumentation rhetoric and theological agenda

Common Discourse Particles in English Conversation Lawrence C. Schourup, 2016-11-18 First published in 1985 this book studies several common items in English conversation known variously as discourse particles interjections discourse markers and more informally hesitations or fillers While the analysis primarily focuses on like well and you know the larger concern is the entire set of items of which these are members and as such I mean now oh hey and aha are also examined These discourse particles are analysed at length and then a framework is proposed in which their use individually makes sense and allows revealing comparisons to be made between them This book will be of interest to students of linguistics

Selves in Two Languages Michèle Koven, 2007-09-07 Bilinguals often report that they feel like a different person in their two languages In the words of one bilingual in Koven's book When I speak Portuguese automatically I'm in a different world it's a different color Although testimonials like this abound in everyday conversation among bilinguals there

has been scant systematic investigation of this intriguing phenomenon Focusing on French Portuguese bilinguals the adult children of Portuguese migrants in France this book provides an empirically grounded theoretical account of how the same speakers enact experience and are perceived by others to have different identities in their two languages This book explores bilinguals experiences and expressions of identity in multicultural multilingual contexts It is distinctive in its integration of multiple levels of analysis to address the relationships between language and identity Koven links detailed attention to discourse form to participants multiple interpretations how such forms become signs of identity and to the broader macrosociolinguistic contexts that structure participants access to those signs The study of how bilinguals perform and experience different identities in their two languages sheds light on the more general role of linguistic and cultural forms in local experiences and expressions of identity
