

SPECIAL TEACHING FOR SPECIAL CHILDREN?
pedagogies for inclusion

What, if anything, is 'special' about teaching children with special or exceptional learning needs? This book addresses this question, looking at pupils' special learning needs – including low attainment, learning difficulties, language difficulties, emotional and behavioural problems and sensory needs.

Some special needs groups (for example, dyslexia) have argued strongly for the need for particular specialist approaches. In contrast, many proponents of inclusion have argued that 'good teaching is good teaching for all' and that all children benefit from similar approaches. Both positions fail to scrutinize this issue rigorously and coherently, and it is this aspect which distinguishes this book.

Leading researchers in key special needs fields critique and defend a conceptual analysis of teaching strategies used with particular learner groups with special educational needs. The book covers deafness; visual impairment; deaf blindness; severe learning difficulties; profound and multiple learning difficulties; Down's Syndrome; English as an additional language and speech, language and communication difficulties; autism spectrum disorders; ADHD; dyslexia; dyspraxia; social, emotional and behavioural difficulties; moderate learning difficulties; mixed difficulties. Summaries by the editors after each chapter link pedagogic strategies, knowledge and curriculum to key points from the chapter and pave the way for discussion.

This book is indispensable reading for students, policy makers, researchers and professionals in the field of special educational needs and inclusion.

Special Teaching For Special Children:

Special Teaching for Special Children Ann Lewis, Brahm Norwich, 2004-11-16 I recommend this book as an important contribution to the debate on pedagogy in special education. It is largely well written and informative and rich with ideas and opinions. Educational Review: What if anything is special about teaching children with special or exceptional learning needs? This book addresses this question looking at pupils' special learning needs including low attainment, learning difficulties, language difficulties, emotional and behavioural problems, and sensory needs. Some special needs groups, for example dyslexia, have argued strongly for the need for particular specialist approaches. In contrast, many proponents of inclusion have argued that good teaching is good teaching for all and that all children benefit from similar approaches. Both positions fail to scrutinise this issue rigorously and coherently, and it is this aspect which distinguishes this book. Leading researchers in each special needs field defend and critique a conceptual analysis of teaching strategies used with particular learner groups with special educational needs. Summaries by the editors after each chapter link pedagogic strategies, knowledge, and curriculum to key points from the chapter and pave the way for discussion. This book is indispensable reading for students, policy makers, researchers, and professionals in the field of special educational needs and inclusion. Shortlisted for the TES/NASEN Book Awards 2005.

BOOK JACKET

Inclusive Education for Children with Special Needs Neena Dash, 2006 Inclusive Education is a worldwide movement aiming to create one education system that values all children. To devise a classroom that welcomes all children irrespective of disability, community background, sexuality, ethnic background, etc. The current conceptualization of children with special needs has replaced the negative labels of the past which called disabled children as lame, crippled, less fortunate, or mentally retarded. The modern concept considers such children as unique, whose uniqueness may be noticed in one or the other dimensions: vision, hearing, communication, adaptive behaviour, etc. Researches are being conducted across the world so that inclusive education can be made more adequate and thereby prove more useful. The present book is a complete treatise on inclusive education with particular emphasis on children with special needs. It seeks to find out how information findings from researches on inclusion can be employed to influence inclusive practices in classrooms in a positive way. It provides useful tips and strategies to those who need to know as to why, whom, and how to include children with special needs in regular classroom activities. The facts and findings stated in this book in the form of tables, pictures, boxes, and small but separate sections will prove comprehensible inputs for school reforms and reorganizations to achieve full inclusion. A detailed bibliography has been included in the book to enable the inquisitive readers to pursue the subject further. The students and research scholars of education will find this book highly useful. In addition, the planners, administrators,
