- (approx. + 10.0 D or more).
- relative spectacle magnification produced by aphakic spectacle correction is approximately 1.33.
- This means that the image produced in the corrected aphakic eye is one third larger than the image formed in an emmetropic eye. This magnification causes the patient to misjudge distances.
- Objects appear to be closer to the eye than they really are because of the increased visual angle subtended at the eye
