Speech Coding Algorithms Foundation And Evolution Of Standardized Coders:

Speech Coding Algorithms Wai C. Chu, 2004-02-19 Speech coding is a highly mature branch of signal processing deployed in products such as cellular phones communication devices and more recently voice over internet protocol This book collects many of the techniques used in speech coding and presents them in an accessible fashion Emphasizes the foundation and evolution of standardized speech coders covering standards from 1984 to the present The theory behind the applications is thoroughly analyzed and proved

Principles of Speech Coding Tokunbo Ogunfunmi, Madihally Narasimha, 2010-04-29 It is becoming increasingly apparent that all forms of communication including voice will be transmitted through packet switched networks based on the Internet Protocol IP Therefore the design of modern devices that rely on speech interfaces such as cell phones and PDAs requires a complete and up to date understanding of the basics of speech

Karagiannidis, Maode Ma, Syed Akhter Hossain, 2020-06-13 This book presents the selected peer reviewed papers from the International Conference on Communication Systems and Networks ComNet 2019 Highlighting the latest findings ideas developments and applications in all areas of advanced communication systems and networking it covers a variety of topics including next generation wireless technologies such as 5G new hardware platforms antenna design applications of artificial intelligence AI signal processing and optimization techniques Given its scope this book can be useful for beginners researchers and professionals working in wireless communication and networks and other allied fields

Optimization Methods in VLSI Design Apoorva S. Shastri, 2025-10-31 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content This machine generated volume with chapter introductions by the human expert of summaries of the existing studies furthers our understanding of the optimization methods in VLSI design This book reviews several algorithms and methods used for solving optimization problems in VLSI Design It introduces optimization methods in VLSI Design using meta heuristic algorithms and how they can be applied to problems like Physical Design Floor Planning etc It provides a review of High level Synthesis techniques such as measuring the quiescent current from the power supply crosstalk noise mitigation methodology and geometric programming for gate sizing to reduce the design time of a VLSI Circuit The book delves into Power Grid Synthesis Efficient Testing and Verification Methods Optimization Approaches for Clocking and Delay Minimization This book is written for researchers professionals and students working in the core areas of electronics and their applications especially in digital VLSI design and systems Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader

would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content
