

The background of the cover is a detailed architectural drawing of the interior of a dome, showing the ribs and the floor. Overlaid on this drawing are several purple-colored architectural details and annotations. In the upper left, there is a complex detail of a vaulted ceiling with a central circular opening. Below it is a smaller, simpler circular detail. To the right, there is a perspective drawing of a vaulted section with a rectangular opening. In the lower left, there is a detail of a vaulted ceiling with a large circular opening and a smaller one above it. At the bottom center, there is a small, simple circular detail.

The Architectural Theory Of Viollet Le Duc Readings And Commentaries:

The Architectural Theory of Viollet-le-Duc Eugène-Emmanuel Viollet-le-Duc, 1990 These readings carefully selected from the entire range of Viollet le Duc's work make available the historical insights and practical principles of one of the most imaginative and inspiring architectural theorists of the modern era

The Architectural Theory of Viollet-le-Duc Eugene-Emmanuel Viollet-Le-Duc, 1990-03-07 Among architects and preservationists the writings of Viollet le Duc 1814-1879 have long been considered major resources They inspired a generation of American architects including Frank Furness John Wellborn Root Louis Sullivan and Frank Lloyd Wright In 1894 the critic Montgomery Schuyler observed that Viollet le Duc's books have had the strongest influence on this generation of readers But for the past century all but one of his works have been out of print in English These readings carefully selected from the entire range of Viollet le Duc's work make available the historical insights and practical principles of one of the most imaginative and inspiring architectural theorists of the modern era M F Hearn has culled from Viollet le Duc's books on architecture the passages in which his major ideas about the theory of architecture are most cogently expressed Hearn has arranged and interplated the readings in a sequence of topics covering Viollet le Duc's views on the architecture of the past his convictions about the education of architects his philosophy of method principles of design and his guidelines for restoration The selections are introduced by a biographical essay connected by interpretive commentaries and followed by a biographical note

Revealing Architectural Design Philip D. Plowright, 2014-01-10 *Revealing Architectural Design* examines the architectural design process from the point of view of knowledge domains domain syntax coherence framing thinking styles decision making and testing Using straightforward language the book connects general design thinking to underlying frameworks that are used in the architectural design process The book provides historical grounding as well as clear examples of real design outcomes It includes diagrams and explanations to make that content accessible The frameworks and their methods are described by what they can accomplish what biases they introduce and the use of their final outcomes *Revealing Architectural Design* is an advanced primer useful to anyone interested in increasing the quality of their architectural design proposals through understanding the conceptual tools used to achieve that process While it is intended for undergraduate and graduate students of architectural design it will also be useful for experienced architectural practitioners For the non architect this book opens a window into the priorities of a discipline seldom presented with such transparency

The Four Modes of Seeing Elizabeth Carson Pastan, 2017-07-05 Borrowing its title from Madeline Harrison Caviness's influential work on the modes of seeing articulated by the twelfth century cleric Richard of Saint Victor this interdisciplinary collection brings together the work of thirty scholars from England France Germany Italy Switzerland and the United States Each author has contributed an original article that engages with ideas formulated in Caviness's wide ranging scholarship The historiographic introduction discusses themes in Caviness's publications and their importance for art historical and medieval studies today The book's thematic matrix groups

together essays concerned with The Material Object Documentary Reconstruction Post Disciplinary Approaches Multiple Readings Gender and Reception Performativity Text and Image Collecting and Consumption and Politics and Ideology The contributors include curators art historians historians and literary scholars Their subjects range from medieval stained glass to the nineteenth century Gothic Revival the Sachsenspiegel and Mel Gibson's The Passion of the Christ Many foreground issues of gender reception and textuality which have permeated Caviness's scholarship Some also present approaches to sites that have been the subject of important studies by Caviness including Canterbury Chartres Reims Saint Denis Sens and Troyes The volume offers a broad range of methodological approaches to key topics in the study of medieval imagery and thus highlights the vitality of the field today *Heritage or Heresy* B. Schildgen, 2016-01-23 This is an account of the roles of local and national movements and of memory and regret in the destruction or preservation of the architectural artistic and historic legacy of Europe in which the author examines what is cultural heritage and why it matters *Don't Build, Rebuild* Aaron Betsky, 2024-11-05 In a time of climate crisis and housing shortages a bold visionary call to replace current wasteful construction practices with an architecture of reuse As climate change has escalated into a crisis the reuse of existing structures is the only way to even begin to preserve our wood sand silicon and iron let alone stop belching carbon monoxide into the air Our housing crisis means that we need usable buildings now more than ever but architect and critic Aaron Betsky shows that new construction often seeking to maximize profits rather than resources often soulless in its feel is not the answer Whenever possible it is better to repair recycle renovate and reuse not only from an environmental perspective but culturally and artistically as well Architectural reuse is as old as civilization itself In the streets of Europe you can find fragments from the Roman Empire More recently marginalized communities from New York to Detroit queer people looking for places to gather or cruise punks looking to make loud music artists and displaced people looking for space to work and live have taken over industrial spaces created then abandoned by capitalism forging a unique style in the process Their methods from urban mining to dumpster diving now inform architects transforming old structures today Betsky shows us contemporary imaginative reuse throughout the world the Mexican housing authority transforming concrete slums into well serviced apartments the MassMOCA museum built out of old textile mills the squatted city of Christiania in Copenhagen fashioned from an old army base Project Heidelberg in Detroit All point towards a new circular economy of reuse built from the ashes of the capitalist economy of consumption **Journal of the Society of Architectural Historians** Society of Architectural Historians, 1996 Includes special issues The Architecture Reader Krista Sykes, 2007 The Architecture Reader brings together for the first time texts written by architects of international esteem **The Theory of Architecture** Paul-Alan Johnson, 1994 This jargon free guide to design and architecture theory helps professionals engage in the discourse of where and what architecture is and has been Ideas That Shaped Buildings M. Fil Hearn, 2003-10-10 Identifying the operative ideas in architectural theory from ancient Rome to the present and codifying them into coherent theoretical

systems for students practitioners and the general reader In *Ideas That Shaped Buildings* Fil Hearn identifies and codifies into theoretical systems the operative tenets of architectural theory from ancient Rome to the present With this strikingly original synthesis of architectural history and theory he constructs an intellectual armature on which virtually any architectural concept past or present can be positioned Dealing mainly with the treatises that have been highly influential historically he organizes their concepts thematically and analyzes their development through time Straightforward and concise *Ideas That Shaped Buildings* is readily accessible to architecture students practicing architects and the general public indeed anyone interested in understanding the design rationale of buildings Its overarching message is that far from being constricting proper knowledge and application of architectural theory is enabling and inspiring and makes creative freedom possible by providing the conceptual awareness needed to devise a design After an introductory history of the development of architectural theory the text is divided into four parts The first deals with issues relevant to all theories of architecture The second treating theory from antiquity to 1800 focuses on the prescriptive conventions inherent in the classical tradition The third treating theory after 1800 focuses on the inspirational principles prompted by rationalist perceptions of the Gothic tradition The fourth treating theory since 1965 deals with rationales beyond rationalism and the influence of computers on design method and design formulation The concepts discussed are illustrated with theoretical drawings and images of actual buildings
