Handbook of Research on Big Data Storage and Visualization Techniques Segall, Richard S., Cook, Jeffrey S., 2018-01-05
The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries. Challenges associated with the analysis, security sharing, storage and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data. The Handbook of Research on Big Data Storage and Visualization Techniques is a critical scholarly resource that explores big data analytics and technologies and their role in developing a broad understanding of issues pertaining to the use of big data in multidisciplinary fields. Featuring coverage on a broad range of topics such as architecture, patterns, programming systems and computational energy, this publication is geared towards professionals, researchers and students seeking current research and application topics on the subject.

Handbook of Research on Big Data and the IoT Kaur, Gurjot, Tomar, Pradeep, 2019-03-29
The increase in connected devices in the internet of things IoT is leading to an exponential increase in the data that an organization is required to manage. To successfully utilize IoT in businesses, big data analytics are necessary in order to efficiently sort through the increased data. The combination of big data and IoT can thus enable new monitoring services and powerful processing of sensory data streams. The Handbook of Research on Big Data and the IoT is a pivotal reference source that provides vital research on emerging trends and recent innovative applications of big data and IoT challenges facing organizations and the implications of these technologies on society and best practices for their implementation. While highlighting topics such as bootstrapping, data fusion and graph mining, this publication is ideally designed for IT specialists, managers, policymakers, analysts, software engineers, academicians and researchers.
