## **The Kleinian Dialogues:**

The Klein-Lacan Dialogues Bernard Burgoyne, 2018-05-01 Throughout the year of 1995 a series of debates took place under the auspices of the Higher Education Network for Research and Information in Psychoanalysis. Leading Kleinian and Lacanian psychoanalysts were brought together to debate key topics of psychoanalytic theory. Subsequently they were asked to submit their papers in written form and this book was compiled. The following areas were discussed: phantasy by Darien Leader and Robert M Young; child analysis by Bice Benvenuto and Margaret Rustin; transference and countertransference by Robert Hinshelwood and Vincetn Palomera; technique and interpretation by Catalina Bronstein and Bernard Burgoyne; sexuality by Jane Temperley and Dany Nobus; the unconscious by Robin Anderson and Filip Geerardyn. The book ends with interviews with Donald Meltzer and Eric Laurent, each significant figures in the fields of Kleinian and Lacanian psychoanalysis respectively. Mary Sullivan provides an introduction setting out the similarities and divergences of the two psychoanalytic paradigms. **The New Klein-Lacan Dialogues** Julia Borossa, Catalina Bronstein, Claire

Pajaczowska, 2018-05-01 This book provides a timely exploration and comparison of key concepts in the theories of Melanie Klein and Jacques Lacan, two thinkers and clinicians whose influence over the development of psychoanalysis in the wake of Freud has been profound and far reaching. Whilst the centrality of the unconscious is a strong conviction shared by both Klein and Lacan, there are also many differences between the two schools of thought and the clinical work that is produced in each. The purpose of this collection is to take seriously these similarities and differences. Deeply relevant to both theoretical reflection and clinical work, the New Klein-Lacan Dialogues should make interesting reading for psychoanalysts, psychotherapists, mental health professionals, scholars, and all those who wish to know more about these two leading figures in the field of psychoanalysis. The collection centres around key concepts such as symbolic function, the ego, the object, the body, trauma, autism, affect, and history and archives. **The Klein-Lacan Dialogues** BERNARD. **Japan in Analysis** Ian Parker, 2008-06-17 This book addresses three key questions: Why is there psychoanalysis in Japan? What do we learn about Japan from its own forms of analysis? and What do we learn about ourselves from Japan? The book is about the development of psychoanalysis and modern subjectivity in Japan. It shows how forms of individual selfhood amenable to therapeutic intervention emerged as Japanese culture has opened up to the West. It is also about how approaches to analysing the self have encountered Japan and how analysts tried to make sense of a culture that once seemed at odds with the aims of psychotherapy. Subject Guide to Books in Print, 1991 The Metanarrative of Suspicion Sandra Kay Baringer, 1999 **Unconscious Communication in Practice** E. Mary Sullivan, 1999 This text presents thinking on psychoanalysis. Communicative theory revises the therapeutic encounter, addressing some of the criticism levelled at classical psychoanalytic technique. Rather than focusing on the distorted elements of client's communications, it highlights client's valid unconscious perceptions of therapists' management of the therapeutic

environment The hallmark of communicative technique is that it gives the clients innate capacity to guide the treatment process Thus the balance of power is consistently addresses The Self and Personality Structure Paul M.
