## **The Labor Force In Economic Development:**

**The Labor Force in Economic Development** John Dana Durand,2015-03-08 This book explores growth and structural change in the labor force that accompany economic development It reports on labor force characteristics in one hundred countries around the world a project of the Population Studies Center at the University of Pennsylvania Based on a world wide compilation of labor force and population statistics of censuses taken during 1946 1966 it presents previously inaccessible data on sex and age patterns of participation in economic activities the size of the labor force in proportion to population and changes in these areas associated with economic development Patterns related to the level and speed of development the structure of employment urbanization and age structure of population are defined Conclusions are offered with regard to changing participation by women young people and the elderly Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**The Labor Force in Economic Development** John D. Durand,1975      **The Theory and Experience of Economic Development** Mark Gersovitz,Carlos F. Diaz-Alejandro,Gustav Ranis,Mark R. Rosenzweig,2012-08-06 This volume first published in 1982 is a collection of original essays written to honour Professor W Arthur Lewis 1979 co winner of the Nobel Prize in economics The authors an international group of distinguished scholars address a varied set of specific issues reflecting Professor Lewis research interests covering topics which include technological change in agriculture analyses of unemployment and income distribution the role of government policy in the development process the historical record of development and the relationship between developed and developing nations The book will be of interest to both the academic researcher and practicing professionals in the international organisations and national governments and are particularly appropriate to graduate courses in economic development cost benefit analysis and economic history

**Labor Force, Employment and Labor Markets in the Course of Economic Development** Lyn Squire,1979      *Population Change and Economic Development in East Asia* Andrew Mason,2001 The fifteen essays in this volume address from several viewpoints the question of what role population change played in East Asia's rapid economic development

**The U-shaped Female Labor Force Function in Economic Development and Economic History** Claudia Dale Goldin,1994 The labor force participation rate of married women first declines and then rises as countries develop Its shape is revealed both across the process of economic development and through the histories of currently advanced countries The initial decline in the participation rate is due to the movement of production from the household family farm and small business to the wider market and to a strong income effect But the income effect weakens and the substitution effect strengthens at some point

This paper explores why the change takes place and why the shape is traced out When women are poorly educated their only wage labor outside the home and family is in manual work against which a strong social stigma exists But when women are educated particularly at the secondary level they enter white collar work against which no social stigma exists Data for more than one hundred countries and for United States history are used to explore the hypothesis of the shaped female labor force function *Women's Changing Participation in the Labor Force* T. Paul Schultz, 1989 Research has rarely tested the proposition that women have lost more than men when low income countries introduce minimum wage legislation and certain other labor market regulations that raise the cost of labor to firms compared with families But such interventions in the labor market may slow women's transition from nonmarket and family work to employment by firms And that may affect the rate and structure of economic growth

Major Programs of the Bureau of Labor Statistics ,1998 **Monthly Labor Review** ,1987 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews

**Research and Development Projects** ,1974 **The Employment and Unemployment of Women in OECD Countries** Liba Paukert,1984 This report examines the major trends in women's employment and unemployment over the past two decades in Organisation for Economic Co operation and Development member countries Employment and unemployment trends in the labor force by sex are first considered The report next examines the growth of the female labor supply and the trends in the labor force participation of women with an analysis of the factors responsible for these

developments It then analyzes the growth of the demand for female labor sector by sector and the development of part time work short term and casual employment the impact of technological change and male and female earnings differentials as they have characterized female employment trends On the basis of these developments which are reviewed on the two sides of the labor market the report examines in a comparative way the movements over conjunctural cycles of male and female unemployment and the reasons for its development Twenty three tables are included YLB **U.S. Economic Growth from 1976 to 1986: Human capital** ,1977

**Perspectives on Labour Economics for Development** Sandrine Cazes, Sher Verick,2013 In developing countries labour markets play a central role in determining economic and social progress since employment status is one of the key determinants of exiting poverty and promoting inclusion Yet the reality in most developing countries is that the labour market fails to create the jobs in the formal economy that would help individuals and their families prosper In recognition of these challenges governments and other stakeholders in developing countries have increasingly prioritised policies and programmes to promote decent work However this requires navigating a range of complex issues and debates surrounding the linkages between development processes and labour market outcomes This volume consists of three main thematic parts Part I provides a broad overview of key issues including characterising the employment challenge in developing countries and the link between economic growth distribution poverty and employment Drawing on the literature and country examples Part II analyses the specific topics of wages migration and education The

final section shifts to a more normative focus addressing labour market institutions and policies along with systematic approaches to quantifying labour markets in developing countries Perspectives on Labour Economics for Development is an invaluable reference for policy makers in middle and low income countries as well as an ideal handbook for teachers and students of economics and development    **Intersectoral Factor Mobility and Agricultural Growth** Yair Mundlak,1979

Research report using mathematical models to access linkages between agricultural development and non agricultural economic growth in Japan analyses the role of rural migration savings and capital flows in growth rates etc Bibliography pp 133 to 137 graphs references and statistical tables    **The Labor Force in Economic Development** John Dana

Durand,1968    Manpower and Employment Development for Economic Growth and Social Justice United States. Agency for International Development. Office of Labor Affairs,1975 Research manual on human resources planning and employment opportunity creation as an integral part of economic planning for economic development in developing countries presents a system for programme planning and programme evaluation of labour force programmes and includes goal development and administrative aspects etc References    **Labor Force Policies for Regional Economic Development** Stephen F.

Seninger,1989-09-21 This book identifies and examines the analytical connections between regional growth and development processes on the one hand and the region s labor force characteristics and qualities on the other The applied policy focus of the discussion places the role of labor resources in the context of labor market institutions theories of regional change and a region s economic development path rather than treating labor as one of several quantifiable economic inputs in a growth equation    the role of the financial sector in the economic development of puerto rico rita m. maldonado,

**Jobs For Development** Gordon Betcherman,Martin Rama,2016-10-06 This book is a sequel to the World Bank s World Development Report 2013 Jobs The central message of that report was that job creation is at the heart of development Jobs raise living standards and lift people out of poverty they contribute to gains in aggregate productivity and they may even foster social cohesion In doing so jobs may have spillovers beyond the private returns they offer to those who hold them Poverty reduction is arguably a public good making everybody better off higher productivity spreads across co workers clusters and cities and social cohesion improves the outcomes of collective decision making But which jobs make the greatest contribution to development and what policies can facilitate the creation of more of these jobs There is no universal answer it depends on the country s level of development demography natural endowments and institutions This volume explores the diversity of jobs challenges and solutions through case studies of seven developing countries These countries drawn from four continents represent seven different contexts a small island nation St Lucia a resource rich country Papua New Guinea agrarian Mozambique urbanizing Bangladesh and formalizing Mexico economies as well as young Tunisia and aging Ukraine populations Using methods drawn from several branches of economics and the social sciences more broadly and analyzing a wide range of data the authors show the different ways in which jobs have contributed to social and economic development in

the countries they have studied and how they can contribute in the future The policy priorities vary accordingly They often extend well beyond traditional labor market instruments to include policy areas not typically considered in national growth strategies     *Occupational Outlook Quarterly* ,1988
