The Politics Of Urban Redevelopment:

The Politics of Urban Development Clarence Nathan Stone, Heywood T. Sanders, 1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development. Urban scholars have come to recognize that cities are shaped by forces beyond their boundaries. From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed. But what else needs to be said about the policies and politics of urban development? To supplement prevailing theories *The Politics of Urban Development* argues that the role of local actors in making development decisions merits closer study. Whatever the structural constraints politics still matters. Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population. The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference.

Restructuring the City Susan S. Fainstein, 1986 **Theories of**

Urban Politics Jonathan S Davies, David L Imbrosio, 2008-11-18 Anybody who thinks the study of urban politics is stagnating needs to pick up a copy of *Theories of Urban Politics*. Insightful analysis of scholarship on traditional topics is supplemented by chapters on nontraditional topics including the new institutionalism, network governance and urban leadership. If you want to keep up with cutting edge debates in urban studies the Davies and Imbrosio volume is essential. Todd Swanstrom Saint Louis University Connects the best traditions of urban political theory with important new contributions on emerging themes. This completely revised second edition is an invaluable book for new students and established scholars. It is accessible, theoretically rich and maps out an exciting and challenging research agenda. It will spend more time open and on the desk than closed and on the bookshelf. Professor Chris Skelcher University of Birmingham Many colleagues have told us that our edition of *Theories of Urban Politics* provided great insights and grounding to students and seasoned researchers alike. We are delighted that so able a successor has emerged. Those that study urban politics need to be challenged and inspired by theory and this book delivers a powerful update for urban scholars. David Judge, Gerry Stoker and Harold Wolman Editors of the First Edition. This long awaited sequel to the pioneering First Edition updates debates and developments through an excellent collection of entirely new essays contributed by some of the leading academics in the field. A special feature of the volume is that it links concerns in urban politics in North America and Europe. An excellent read. Professor David Wilson De Montfort University Expanding and updating the successful first edition *Theories of Urban Politics* Second Edition provides a comprehensive introduction to and evaluation of the theoretical approaches to urban governance. Restructured into four new parts Power, Governance, Citizens and Challenges the second edition reflects developments in the

field over the last decade with newly commissioned chapters updating and adding to the theoretical material included in the first edition. With contributions from many of the key figures in urban theory today this text will be required reading on all urban politics, urban planning and public administration courses.

Mega-Projects Alan A. Altshuler, David E. Luberoff, 2004-05-13 A Brookings Institution Press and Lincoln Institute of Land Policy publication. Since the demise of urban renewal in the early 1970s the politics of large scale public investment in and around major American cities has received little scholarly attention. In *Mega Projects* Alan Altshuler and David Luberoff analyze the unprecedented wave of large scale mega public investments that occurred in American cities during the 1950s and 1960s. The social upheavals they triggered which derailed large numbers of projects during the late 1960s and early 1970s and the political impulses that have shaped a new generation of urban mega projects in the decades since. They also appraise the most important consequences of policy shifts over this half century and draw out common themes from the rich variety of programmatic and project developments that they chronicle. The authors integrate narratives of national as well as state and local policymaking and of mobilization by mainly local project advocates with a profound examination of how well leading theories of urban politics explain the observed realities. The specific cases they analyze include a wide mix of transportation and downtown revitalization projects drawn from numerous regions most notably Boston, Denver, Los Angeles, New York City, Chicago, Atlanta, Dallas, Portland and Seattle. While their original research focuses on highway, airport and rail transit programs and projects they draw as well on the work of others to analyze the politics of public investment in urban renewal, downtown retailing, convention centers and professional sports facilities. In comparing their findings with leading theories of urban and American politics Altshuler and Luberoff arrive at some surprising findings about which perform best and also reveal some important gaps in the literature as a whole. In a concluding chapter they examine the potential effects of new fiscal pressures, business mobilization to relax environmental constraints and security concerns in the wake of September 11. And they make clear their own views about how best to achieve a balance between developmental, environmental and democratic values in public investment decisionmaking.

Integrating fifty years of urban development history with leading theories of urban and American politics, *Mega Projects* provides significant new insights into urban and intergovernmental politics.

The Politics of Planning for Urban Redevelopment Sheldon Jay Plager, Joel F. Handler, [Cityscapes and Capital](#) Michael A. Pagano, Ann O'M.

Bowman, 1997-09-05 The authors draw on comparative data from 10 medium sized cities and examine 40 city supported development projects to show how city investment in and regulation of development projects is the most effective way for political leaders to control and shape the future of their city. 19 illustrations.

Revitalizing Urban Neighborhoods William Dennis Keating, Norman Krumholz, Philip Star, 1996 Since the 1950s and the advance of urban renewal local governments and urban policy have focused heavily on the central business district. However such development has all but ignored the inner city neighborhoods that continue to struggle in the shadows of high rise America. This analysis of urban

neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development Together they show how urban neighborhoods can and must be preserved as economic cultural and political centers Events and Urban Regeneration Andrew Smith,2012-03-15 In recent years major sporting and cultural events such as the Olympic Games have emerged as significant elements of public policy particularly in efforts to achieve urban regeneration As well as opportunities arising from new venues these events are viewed as a way of stimulating investment gaining civic engagement and publicizing progress to assist the urban regeneration process more generally However the pursuit of regeneration involving events is a practice that is poorly understood controversial and risky Events and Urban Regeneration is the first book dedicated to the use of events in regeneration It explores the relationship between events and regeneration by analyzing a range of cities and a range of sporting and cultural events projects It considers various theoretical perspectives to provide insight into why major events are important to contemporary cities It examines the different ways that events can assist regeneration as well as problems and issues associated with this unconventional form of public policy It identifies key issues faced by those tasked with using events to assist regeneration and suggests how practices could be improved in the future The book adopts a multi disciplinary perspective drawing together ideas from the geography urban planning and tourism literatures as well as from the emerging events and regeneration fields It illustrates arguments with a range of international case studies placed within and at the end of chapters to show positive outcomes that have been achieved and examples of high profile failures This timely book is essential reading for students and practitioners who are interested in events urban planning urban geography and tourism

How Ideas Shape Urban Political Development Richardson Dilworth,Timothy P. R. Weaver,2020-05-15 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in How Ideas Shape Urban Political Development argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal

disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel B land Debjani Bhattacharyya Robert Henry Cox Richardson Dilworth Jason Hackworth Marcus Anthony Hunter William Hurst Sally Ford Lawton Thomas Ogorzalek Eleonora Pasotti Joel Rast Douglas S Reed Mara Sidney Lester K Spence Vanessa Watson Timothy P R Weaver Amy Widestrom
